Fund Management Commentary

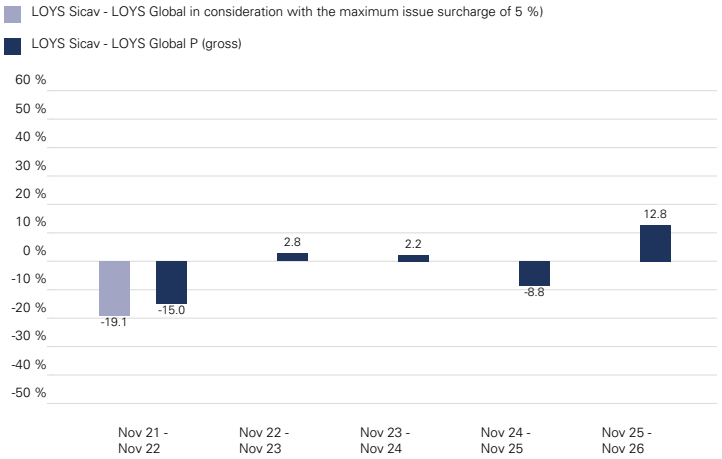

With a net gain of 3.9 per cent, the LOYS Global enjoyed a golden October. Rising oil prices and protests in France dominated the financial markets over the past four weeks. On balance, the equity markets remained relatively unfazed in October, apart from a correction in semiconductor and AI shares towards the end of the month. Brazil, however, proved to be a real rollercoaster ride, with a run-off election initially sparking euphoria, only for the incumbent to be re-elected two weeks later. Whilst the Brazilian real weakened, the US dollar recently gained ground against the euro. The Japanese yen also trended higher. The market is now eagerly awaiting the US mid-term elections. CTS Eventim was added to the LOYS Global portfolio after the company's shares had fallen sharply in the meantime. The same applies to the Finnish healthcare provider Terveystalo and Alcoa from the US. The oil services provider SLB and the data services provider MSCI were sold.

Important Information:

[1]The gross value development (BVI method) takes into account all costs incurred at fund level (for example, the management fee) with the exception of any front-end load that may be incurred (this is otherwise marked separately). Additional costs may be incurred individually at customer level (e.g. custody account fees, commissions and other fees). Model calculation (net): One investor would like to purchase units for EUR 1000. With a maximum initial sales charge of 5%, he or she must spend a one-off of EUR 50. Additionally, custody account costs may be incurred which affect the performance of the portfolio reduce the deposit costs. The custody account costs result from the price and service list of your Bank. Historical performance is not a reliable indicator of future performance.
