Fund Management Commentary

During May, the LOYS Global fund price rose by just under 4%, further solidifying the upward trend that began after the change in management in early December. The start of this month was also marked by fears of a new oil crisis. Rising inflation rates and falling bond prices reflect these concerns. The stock markets, however, particularly in the U.S., appeared largely unfazed by these macroeconomic concerns. Given the high weightings of just a few stocks, fossil fuel stocks do not play a prominent role on the stock exchanges. Instead, so-called technology stocks are leading the way, and this sector has reported strong corporate earnings. Accordingly, U.S. stocks hit new records. The fund manager of LOYS Global has been busy over the past four weeks, increasing positions in Ziff Davis, UiPath, Euronet Worldwide, and Booking.com. Meanwhile, positions in Mitek, Okta, and Advanced Micro Devices were reduced.

Important Information:

¹The gross value development (BVI method) takes into account all costs incurred at fund level (for example, the management fee) with the exception of any front-end load that may be incurred (this is otherwise marked separately). Additional costs may be incurred individually at customer level (e.g. custody account fees, commissions and other fees). Model calculation (net): One investor would like to purchase units for EUR 1000. With a maximum initial sales charge of 5%, he or she must spend a one-off of EUR 50. Additionally, custody account costs may be incurred which affect the performance of the portfolio reduce the deposit costs. The custody account costs result from the price and service list of your Bank.
