

## Investment Strategy

The investment strategy of the LOYS Global L/S fund is generally categorized as "long/short equity, long biased". Our edge is the identification and exploitation of misvalued stocks on the international developed equity markets. Our investment universe thereby is not limited to specific countries or sectors; in principle any stock exchange traded company all around the world can be a potential investment. On the basis of a fundamental bottom-up analysis, the fund will trade equity that is significantly undervalued. We demand a margin of safety and do not enter a new position until we have identified a high-quality share that trades with at least 30% discount to its fair value. In order to reduce market risk, maximum draw downs and volatility, the long portfolio is hedged by short selling the respective most liquid country indices (e.g. DAX). As most defensive fund of the LOYS fund range, the LOYS Global L/S has a net long exposure between 10-60% and a target return of 3-6% p.a..

## Fund Management Commentary

The LOYS Global LS reported a decline in net asset value of around 4 % at the start of the summer in June. Contrary to an old stock market heuristic, according to which political events tend not to lead to major trouble on the financial markets, European and above all French government bonds and equities came under strong downward pressure following the European elections. Nevertheless, it should be noted that the European Central Bank embarked on a cycle of interest rate cuts in June. Optimistic news from the US software and semiconductor sector (Oracle, Broadcom, Adobe, etc.) provided a tailwind for US technology shares. The euro weakened against the US dollar, as did the Japanese yen. British equities accounted for a quarter of the LOYS Global LS portfolio volume at the end of the first half of the year.

## Important Information:

<sup>1</sup>The gross value development (BVI method) takes into account all costs incurred at fund level (for example, the management fee) with the exception of any front-end load that may be incurred (this is otherwise marked separately). Additional costs may be incurred individually at customer level (e.g. custody account fees, commissions and other fees). Model calculation (net): One investor would like to purchase units for EUR 1000. With a maximum initial sales charge of 5%, he or she must spend a one-off of EUR 50. Additionally, custody account costs may be incurred which affect the performance of the portfolio reduce the deposit costs. The custody account costs result from the price and service list of your Bank. This document is for informational purposes only and does not constitute an offer or solicitation of an offer for the LOYS Sicav - LOYS Global and may not be used as an offer or solicitation. Predictive statements are based on assumptions. Since all assumptions, predictions and statements simply reflect the current view of future events, they are quite naturally subject to inherent risks and uncertainties. Thus, they should not be regarded as guarantees or promises regarding future performance. Investors are alerted that future performance can vary greatly from past results. Especially performance results referring to a period of less than twelve months (Year-to-date-performance, start of investment fund within the last twelve months) does not reliably indicate future results due to the short period of comparison. Hence, the future performance of the investment cannot be guaranteed. Sole basis for the purchase of units are the offering documents of this product (the latest prospectus, the Key Investor Information Document, the latest statement of accounts and - if older than 8 months - the latest half-year review) that can be requested free of charge from LOYS AG, Barckhausstr. 10, 60325 Frankfurt am Main, from HAUCK & AUFHÄUSER INVESTMENT GESELLSCHAFT S.A., R.C.S.LUXEMBURG NR.
