## Fund Management Commentary

In March, LOYS Global slipped by around 6% in a weak market environment. The dominant factor in March was the changing tide of American politics. The new US administration's support for Moscow's interests and the simultaneously harsh and disparaging treatment of related countries led to readjustments in the political world. Added to this is the aggressive trade policy being pursued by President Trump, particularly towards partner countries. US equities and the US dollar in particular suffered as a result. German government bonds were also among the losers of the month following the de facto abolition of the so-called 'debt brake'. The fund management of LOYS Global further increased its US exposure in the past four weeks and added new stocks to the portfolio with Evercore, Accenture and the financial software manufacturer Intuit.

**Important Information:**

The gross value development (BVI method) takes into account all costs incurred at fund level (for example, the management fee) with the exception of any front-end load that may be incurred (this is otherwise marked separately). Additional costs may be incurred individually at customer level (e.g. custody account fees, commissions and other fees). Model calculation (net): One investor would like to purchase units for EUR 1000. With a maximum initial sales charge of 5%, he or she must spend a one-off of EUR 50. Additionally, custody account costs may be incurred which affect the performance of the portfolio reduce the deposit costs. The custody account costs result from the price and service list of your Bank.
