

Investment Strategy

The LOYS Premium Dividende fund's investment strategy is to achieve sustained growth in the value of the assets contributed by unitholders. To attain this investment objective, the fund invests in listed companies with sustainable and continuous dividend payments. The aim is to enable investors to achieve capital appreciation in as many capital market situations as possible. The fund invests exclusively in stocks emitted by issuers domiciled in Europe and aims to be fully invested at all times. The fund's investment policy also provides for the acquisition of shares in companies with a low market capitalization.

Fund Management Commentary

The LOYS Premium Dividend posted an increase of almost 6.5% in May. Despite this, the problematic issues on the financial markets have remained the same. America's trade dispute with the rest of the world continues to dominate the headlines, especially as it is somewhat wild and sometimes contradictory. Recently, it has become apparent that the interest rate markets are increasingly concerned about American policy-making. This resulted in the lowering of America's credit rating. The US dollar also tended to come under downward pressure. The same can be said for oil prices after Saudi Arabia announced an increase in production. From the LOYS Premium Dividend portfolio, we can report that the Swedish paper manufacturer Billerud was sold; Hello Fresh and Puma were also sold.

Important Information:

¹The gross value development (BVI method) takes into account all costs incurred at fund level (for example, the management fee) with the exception of any front-end load that may be incurred (this is otherwise marked separately). Additional costs may be incurred individually at customer level (e.g. custody account fees, commissions and other fees). Model calculation (net): One investor would like to purchase units for EUR 1000. With a maximum initial sales charge of 5%, he or she must spend a one-off of EUR 50. Additionally, custody account costs may be incurred which affect the performance of the portfolio reduce the deposit costs. The custody account costs result from the price and service list of your Bank.
