Fund Management Commentary

The market correction in March led to a decline in the net asset value of the LOYS Innovation Leaders. Financial markets were dominated by the conflict between Israel and the U.S. and Iran. The sharp rise in oil prices was a particular focus of attention. Overall, all asset classes posted losses. The setbacks in the bond sector were particularly striking, with the yield on 10-year German government bonds rising well above the 3% mark. Gold and silver performed surprisingly weakly after the bull market in this sector came to an end. The stock markets experienced a significant correction, and once again, software stocks were the hardest hit. Economists revised their growth forecasts for the global economy downward.
