Fund Management Commentary

In September, the LOYS Global performed somewhat more weakly, with a 2 per cent fall in price. The most significant development over the past four weeks has undoubtedly been the sharp rise in capital market interest rates worldwide. Led by the US, where ten-year government bonds are now trading at a yield of 5.25 per cent, interest rates in Europe, Japan and Asia have also risen significantly. At the short end of the yield curve, the Fed in the US, the Bank of Japan and the European Central Bank also raised their key interest rates. The trigger for these higher key interest rates was, in each case, rising inflation rates and their persistent persistence above the 2 per cent target. In the wake of the sharp rise in interest rates, both the US dollar and the Japanese yen strengthened. The equity markets fared less well. In September, LOYS Global established initial positions in H&R Block and Partners Group. Positions in Okta and Wix were reduced.

Important Information:

[1]The gross value development (BVI method) takes into account all costs incurred at fund level (for example, the management fee) with the exception of any front-end load that may be incurred (this is otherwise marked separately). Additional costs may be incurred individually at customer level (e.g. custody account fees, commissions and other fees). Model calculation (net): One investor would like to purchase units for EUR 1000. With a maximum initial sales charge of 5%, he or she must spend a one-off of EUR 50. Additionally, custody account costs may be incurred which affect the performance of the portfolio reduce the deposit costs. The custody account costs result from the price and service list of your Bank.
