

## Investment Strategy

The LOYS Global System fund's investment strategy takes advantage of undervalued, high-quality securities in the global stock markets. The investment universe includes stocks in all sectors and geographies irrespective of benchmark constraints. Based on rigorous fundamental analysis the fund invests in significantly undervalued companies with a sustainable, competitive business model and shareholder-friendly management. The individual equities in the portfolio are weighted according to their relative attractiveness as measured by discount to intrinsic value and quality of the company. The portfolios constructed carefully taking into account liquidity requirements and diversification across market capitalizations, geographies and sectors. The fund's goal is a broad diversification with single positions actively not weighted more than 2.5% in the fund. The fund aims to be fully invested at all times.

## Fund Management Commentary

The LOYS Aktien Global reported a positive performance in June, with a recorded growth of around one percent for the month as a whole. Despite continuing confusion about new and additional trading tariffs, a clearer picture has recently emerged on the financial markets. The central banks will counter the weakening economic growth with interest rate cuts. There are no acute concerns about inflation. Printed money is finding its way into the bond markets, which have been bullish for more than thirty years and show the characteristics of a speculative bubble, constructed by the state. Most recently, the Boiron position in the LOYS Aktien Global was reduced. The same applies to the Japanese company Glory. Nakanishi and Nexity, on the other hand, were increased.

**Important Information:**

<sup>1</sup>The gross value development (BVI method) takes into account all costs incurred at fund level (for example, the management fee) with the exception of any front-end load that may be incurred (this is otherwise marked separately). Additional costs may be incurred individually at customer level (e.g. custody account fees, commissions and other fees). Model calculation (net): One investor would like to purchase units for EUR 1000. With a maximum initial sales charge of 5%, he or she must spend a one-off of EUR 50. Additionally, custody account costs may be incurred which affect the performance of the portfolio reduce the deposit costs. The custody account costs result from the price and service list of your Bank. Predictive statements are based on assumptions. Since all assumptions, predictions and statements simply reflect the current view of future events, they are quite naturally subject to inherent risks and uncertainties. Thus, they should not be regarded as guarantees or promises regarding future performance. Investors are alerted that future performance can vary greatly from past results. Especially performance results referring to a period of less than twelve months (Year-to-date-performance, start of investment fund within the last twelve months) does not reliably indicate future results due to the short period of comparison. Hence, the future performance of the investment cannot be guaranteed. Sole basis for the purchase of units are the offering documents of this product (the latest prospectus, the Key Investor Information Document, the latest statement of accounts and - if older than 8 months - the latest half-year review) that can be requested free of charge from LOYS AG, Stau 142, D-26122 Oldenburg, from HAUCK & AUFHÄUSER INVESTMENT GESELLSCHAFT S.A., R.C.S.LUXEMBURG NR.
