

Sales Prospectus

including Terms and Conditions

LOYS Global MH

Unit class A (t)

Unit class B (t)

Unit class C (t)

Mixed fund
01/2022

Investment units are purchased and sold based on the sales prospectus, the key investor information and the General Terms and Conditions of Investment in conjunction with the “Special Terms and Conditions of Investment” currently in force. The General Terms and Conditions of Investment and the Special Terms and Conditions of Investment are printed subsequent to this sales prospectus.

The sales prospectus shall be provided free of charge together with the most recently published annual report and the semi-annual report published after the annual report, where applicable, to persons interested in purchasing a unit and each investor of the Fund upon request. In addition, the key investor information shall be provided to persons interested in purchasing a unit free of charge and in due time before concluding the contract.

It is not permitted to issue any information or statements at variance with this sales prospectus.

Any purchase or sale of units based on information or statements not contained in this sales prospectus and/or the key investor information shall occur exclusively at the buyer's risk.

The sales prospectus is supplemented by the most recent annual report and the semi-annual report published after the annual report, where appropriate.

Restriction on sales / investment restrictions for U.S. individuals:

The issued units of this Fund may only be offered for sale or sold in countries where such an offer or sale is admissible.

Ampega Investment GmbH and its investment funds are not registered in accordance with the United States Investment Company Act of 1940 as amended. The units offered through this sales prospectus are not and will not be registered in accordance with the United States Securities Act of 1933 as amended or a securities act of any Federal State of the United States of America. Units may neither be offered or sold in the United States nor to or for the account of U.S. individuals. Where applicable, persons interested in purchasing a unit must demonstrate that they are no U.S. individuals and neither purchase any units on behalf of nor resell them to U.S. individuals. U.S. individuals are individuals who are citizens of or domiciled in the USA and/or liable to tax/resident there. U.S. individuals can also be partnerships or corporations which were established under the laws of the USA and/or any Federal State, territory or a possession of the United States. In cases where the Company obtains knowledge of the fact that a unit holder is a U.S. individual or holds units for the account of a U.S. individual, the Company may request immediate return of the units to the Company at the value last determined.

This prospectus must not be distributed in the United States of America or to U.S. individuals.

Main legal effects of the contractual relationship

Due to the acquisition of the units, the investor becomes a pro-rata co-owner of the assets held by **LOYS Global MH**. He or she may not dispose of the assets. No voting rights are attached to the units.

All publications and advertising brochures must be drafted in German or provided with a German translation. Moreover, Ampega Investment GmbH shall conduct the entire communication with their investors in German.

Enforcement of rights

The legal relationship between **Ampega Investment GmbH** and the investor as well as the pre-contractual relationships are governed by German law.

The domicile of **Ampega Investment GmbH** is the place of jurisdiction for actions of the investor against the management company arising from the contractual relationship. Investors who are consumers (see the definition below) and reside in another EU country may also take legal action before a competent court at their place of residence. The enforcement of court judgments is governed by the Code of Civil Procedure (Zivilprozessordnung, ZPO), if necessary, by the Law on Compulsory Sale of Real Property (Gesetz über die Zwangsversteigerung und die Zwangsverwaltung) or the Insolvency Code (Insolvenzordnung, InsO). Since Ampega Investment GmbH is subject to German law, it is not necessary to recognise German judgments before they are enforced. In order to enforce their rights, investors may have recourse to law before courts of ordinary jurisdiction or, if available, also pursue an alternative dispute resolution procedure.

In case of any disputes, consumers might have recourse to the “ombudsman service for investment funds” of BVI Bundesverband Investment und Asset Management e.V. (Federal Investment and Asset Management Association) as competent consumer arbitration board. Ampega Investment GmbH and its funds participate in dispute settlement procedures before this arbitration board.

The contact data of the “ombudsman service for investment funds” of BVI Bundesverband Investment und Asset Management e.V. is as follows:

Office of the ombudsman service
Bundesverband Investment und Asset Management e.V.
Unter den Linden 42
10117 Berlin
Germany
Phone: +49 (0)30 6449046-0
Fax: +49 (0)30 6449046-29
Email: info@ombudsstelle-investmentfonds.de
www.ombudsstelle-investmentfonds.de

The European Commission has set up a European online dispute resolution platform at www.ec.europa.eu/consumers/odr. Consumers can use this for the out-of-court settlement of disputes arising from online sales contracts or online service contracts. The Company's e-mail address is: fonds@ampega.com.

Consumers are natural persons who invest in the Fund for a purpose which, for the most part, cannot be attributed to their commercial or self-employed occupational activity, i.e. which are for private purposes.

In case of disputes arising from the application of the provisions set out in the German Civil Code (Bürgerliches Gesetzbuch, BGB) that relate to distance contracts on financial services, this is the arbitration body of the German Central Bank. The right to have recourse to the courts remains unaffected hereof.

The contact data is as follows:
German Central Bank
Arbitration body
P.O. Box 11 12 32
60047 Frankfurt
Germany
E-mail: schlichtung@bundesbank.de
www.bundesbank.de

For disputes relating to sales contracts or service contracts that have been brought about electronically, consumers may also contact the EU's online dispute resolution platform (www.ec.europa.eu/consumers/odr). The following e-mail address

may be indicated as contact address of the management company: fonds@ampega.com. The platform itself is not a dispute resolution body, but only arranges contact with a competent national arbitration board.

The right to have recourse to the court remains unaffected by a dispute resolution procedure.

Fundamentals

The Fund

The **LOYS Global MH** (hereinafter referred to as the “Fund”) is an undertaking for collective investment that collects capital from a number of investors to invest it in accordance with a defined investment strategy for the benefit of such investors (hereinafter referred to as the “Investment Fund”). The Fund is an investment fund pursuant to Directive 2009/65/EC on the coordination of legal administrative provisions of the European Parliament and Council dated 13 July 2009 that refers to certain undertakings for collective investment in transferable securities (UCITS) within the meaning of the German Capital Investment Code (Kapitalanlagegesetzbuch, KAGB). It is managed by Ampega Investment GmbH (hereinafter referred to as the “Company”). On 8 February 2006 the LOYS Global MH was established for an indefinite period. The Company took over the management of the Fund on 1 October 2015.

The Company invests the capital deposited with it in its own name for joint account of the investors in accordance with the principle of risk diversification in the assets permitted by the Capital Investment Code and separated from its own assets in the form of funds. The purpose of the Fund is limited to investing in accordance with a defined investment strategy within the framework of collective asset management by means of the funds invested with it; an operational activity and an active corporate management of the assets held are excluded.

The Capital Investment Code and the associated subordinate legislation as well as the German Investment Tax Act (Investmentsteuergesetz, InvStG) and the Terms and Conditions of Investment where the legal relationship between the investors and the Company is stipulated provide in which assets the Company may invest the investors’ money in compliance with which provisions. The Terms and Conditions of Invest-

ment comprise a general and a special part (“General Terms and Conditions of Investment” and “Special Terms and Conditions of Investment”). The use of Terms and Conditions of Investment for a fund is subject to permission by the Bundesanstalt für Finanzdienstleistungsaufsicht (“BaFin”) [German Federal Financial Supervisory Authority]. The Fund does not belong to the Company’s insolvency estate.

Sales documents and disclosure of information

The sales prospectus, the key investor information, the Terms and Conditions of Investment as well as the current annual and semi-annual reports are available at the Company free of charge. Moreover, the current versions of such documents can be retrieved in electronic form on the homepage of the Company (www.ampega.com).

Moreover, the Company provides information on the investment limits of the risk management related to the investment assets, the methods of risk management and the most recent development of risks and yields of the most important categories of assets of the funds.

Terms and Conditions of Investment and their amendment

The Terms and Conditions of Investment are printed subsequent to this sales prospectus. The Terms and Conditions of Investment may be amended by the Company. Amendments to the Terms and Conditions of Investment are subject to permission by BaFin. Amendments to the investment principles of the Fund are admissible solely with the proviso that the Company either offers the investors to redeem their units free of charge or offers them to exchange their units free of charge for units in investment funds with comparable investment principles insofar as such funds are managed by the Company or any other company of its Group.

The intended amendments are announced in the Federal Gazette and, in addition, on the Internet on the homepage of the Company (www.ampega.com). If the amendments affect remunerations and reimbursements of expenses that may be withdrawn from the Fund, or the investment principles of the Fund or essential investor rights, the investors are, in addi-

tion, informed hereon by their custodian banks via a medium on which information is stored, open to view and presented unchanged for a period appropriate for the purposes of such information in hard copy or in electronic form (so-called “durable medium”). The information comprises the essential contents of the intended amendments, the relevant reasons, the rights of the investors arising in connection with the amendment as well as information as to where and how further information can be obtained.

The amendments take effect on the day that follows their announcement at the earliest. Amendments to provisions pertaining to the remunerations and reimbursement of expenses take effect four weeks after their announcement at the earliest unless an earlier date has been determined with the approval of the German Federal Financial Supervisory Authority. Amendments to the previous investment principles of the Fund also take effect four weeks after their announcement at the earliest.

Management company

Firm, legal structure and registered office

The Company is an investment management company within the meaning of the German Capital Investment Code and with the legal form of a limited-liability company (Gesellschaft mit beschränkter Haftung, GmbH) that was established on 28 December 1967. The name of the Company is Ampega Investment GmbH. The Company has its registered office at Charles-de-Gaulle-Platz 1, 50679 Cologne, Germany.

Since 22 January 1968, the Company has been licensed to manage securities funds and special funds. In addition, it has been licensed to manage money market, investment fund unit and pension funds since 22 September 1998 and real estate and mixed securities and real estate funds since 6 December 2001. Following the changeover of its operating license to the outline conditions set out in the German Investment Act (Investmentgesetz, InvG) as of 1 January 2006, the Company has been licensed to manage Directive-compliant funds, real estate funds, mixed funds and pension funds within the meaning of InvG. Since 5 June 2012, the Company has held a full license within the meaning of InvG. It was thus licensed to manage all

of the fund types stipulated in the German Investment Act (domestic investment funds and also EU investment funds).

The Company was thus licensed as management company under the German Investment Act; it is thus considered to have been issued a license under the German Capital Investment Code as a UCITS management company. In addition, the German Federal Financial Supervisory Authority issued the Company with a license to manage alternative investment funds (AIF) under the German Capital Investment Code on 24 July 2014. The Company is thus licensed as an external UCITS management company and as an external AIF management company under the German Capital Investment Code. It is permitted to manage the following types of investment fund: UCITS funds, mixed investment funds, other investment funds, real estate funds, open-end domestic special AIF with fixed terms of investment which invest in specific types of assets (section 284 (1) and (2) KAGB), general open-end domestic special AIF - with the exception of hedge funds - which invest in specific types of assets (section 284 (1) and (2) KAGB). The Company thus also pursues collective asset management for EU UCITS, EU AIF and foreign assets which are analogous to domestic investment funds. The Company may also manage individual assets invested in financial instruments within the meaning of section 1 (11) of the German Banking Act (Kreditwesengesetz, KWG) on behalf of other investors, with its own discretionary powers, including portfolio management for third-party investment funds.

Management and Supervisory Board

Detailed information on the management and the composition of the Supervisory Board is provided at the end of the sales prospectus.

Equity and additional own resources

The Company has a share capital and thus liable funds in the amount of EUR6m.

The Company has covered the professional liability risks that arise from the management of investment funds and are not in accordance with the UCITS Directive, i.e. so-called alternative investment funds (“AIF”), and professional negligence of

its bodies or employees by: own resources at a minimum rate of 0.01 per cent of the value of the portfolio of all managed AIFs whereas this amount shall be reviewed and adjusted on an annual basis. These own resources are included in the liable funds stated above.

Custodian

Identity of the custodian

The financial institution Hauck & Aufhäuser Privatbankiers AG with registered office in Kaiserstr. 24, 60311 Frankfurt am Main, Germany, has assumed the function as custodian for **LOYS Global MH**. The custodian is a credit institution under German law.

Custodial functions

The Capital Investment Code provides for a separation of management and custody of funds. The custodian holds the assets in custody on blocked custody accounts or on blocked accounts respectively. For assets that cannot be held in custody, the custodian checks if the management company has acquired title to these assets. It controls whether the disposal of the assets on the part of the Company is in accordance with the Capital Investment Code and the Terms and Conditions of Investment. The investment in bank deposits held with another financial institution as well as disposing of such bank deposits require approval by the custodian. The custodian must give its approval if the investment or disposal is compatible with the Terms and Conditions of Investment and the provisions set out in the Capital Investment Code.

In addition, the following duties are particularly incumbent on the custodian:

- issue and redemption of the units of the Fund,
- ensure that the issue and redemption of the units as well as the determination of the unit value are in accordance with the provisions set out in the Capital Investment Code and the Terms and Conditions of Investment of the Fund,
- ensure that it obtains custody of the proceeds of business transactions entered into for joint account of the investors within the usual time limits,

- ensure that the proceeds of the Fund are used in accordance with the provisions set out in the Capital Investment Code and the Terms and Conditions of Investment,
- monitor borrowings by the Company for account of the Fund and approve the borrowing, if required,
- ensure that collateral for loans on securities is provided in a legally effective manner and available at any time.

Conflicts of interests

The custodian acts independently, honestly and professionally in the performance of its duties and in the interest of the Fund and its investors. This obligation is reflected, in particular, in the obligation to carry out and organise the activities as custodian in such a way that potential conflicts of interests are minimised to a large extent.

The tasks of the management company and the custodian may not be performed by one and the same company.

The custodian shall not engage in any activities relating to the Fund or the management company acting on behalf of the Fund which would be likely to create conflicts of interest between the Fund, the investors of the Fund, its management company and the custodian's agents and the custodian itself. This shall not apply if there has been a functional and hierarchical separation of the performance of its duties as custodian from its potentially conflicting tasks and the potential conflicts of interest are duly identified, managed, monitored and disclosed to the investors of the Fund.

The custodian may not reuse the assets belonging to the fund assets.

The custodian is entitled to transfer custody of custodial financial instruments to a third party ("sub-custodian") in compliance with applicable law. The sub-custodian may in turn delegate the tasks entrusted to it on the same conditions.

None of the sub-custodians set out on the list is a group company of the custodian.

Potential conflicts of interest may arise if the custodian delegates individual custodial tasks and/or the sub-custody to another outsourcing company. If this outsourcing company is an

affiliate of the Company or the custodian (e.g. parent company), this may give rise to potential conflicts of interests in the interaction between such outsourcing company and the management company or the custodian respectively (in assigning custodial tasks or selecting the sub-custodian, the management company and/or the custodian could, for instance, prefer an affiliated company over other equivalent providers). If such a conflict or another conflict of interests is identified in future in connection with the sub-custody, the custodian will disclose the circumstances and measures taken to prevent or minimise the conflict of interests in the document retrievable under the aforementioned link.

The management company and the custodian have appropriate and effective measures (such as procedural instructions and organisational measures) to ensure that potential conflicts of interests are minimised to a large extent. If conflicts of interests cannot be prevented, the management company and the custodian will identify, manage, monitor and disclose these conflicts in order to avoid damaging the interests of the investors. Compliance with these measures is monitored by an independent compliance function.

Sub-custody

The custodian has delegated the following custodial tasks to another company (sub-custodian):

- The assets held for account of the Fund are held in custody by
- Clearstream Banking S.A., Luxembourg / Clearstream Banking AG, Frankfurt am Main, mainly for German equities and bond
 - Citibank N.A., London

and for German and foreign fund units mainly by

- Clearstream Banking S.A., Luxembourg / Clearstream Banking AG, Frankfurt am Main
- B. Metzler seel. Sohn & Co. KGaA, Frankfurt am Main
- ifsam - International Fund Services & Asset Management S.A., Luxembourg
- Fondsdepot Bank GmbH, Hof
- Augsburger Aktienbank AG, Augsburg

In addition, the following special depository is used:

- Standard Chartered Bank (Group)

According to the information provided by the custodian, the delegation does not result in any conflicts of interests.

Liability of the custodian

The custodian is basically responsible for all assets which it holds in custody or which are held in custody by another agent. In case of a loss of such an asset, the custodian shall be liable to the Fund and its investors unless the loss is due to events beyond the custodian's sphere of influence. In principle, the custodian shall only be liable for any damage excluding the loss of an asset if it has failed to meet its liabilities as set out in the provisions of the Capital Investment Code at least in a negligent manner.

Additional information

Upon request, the Company provides investors with updated information on the custodian and its duties, on the sub-custodians as well as potential conflicts of interest in connection with the activities of the custodian or sub-custodians. The Company's homepage <https://www.ampega.com/leistungen/publikumsfonds/hinweise/> contains further information about the sub-custodians commissioned by the custodian.

Investment objectives, principles of investment and investment limits

The **LOYS Global MH** is a mixed fund. The investors own an interest in the assets of the Fund as co-owners in proportion to the number of units held.

The **LOYS Global MH** is a unit class fund, i.e. various unit classes might be offered to the investors. All issued units bear the same rights except for the differences that arise due to the establishment of the unit classes. Currently the Company has created unit classes A (t), B (t) and C (t) for the Fund. Unit classes can be created for the Fund which differ in terms of the appropriation of earnings, the front-end fee, the currency of the unit value including the use of currency hedging transactions, the management fee, the custodian fee, the distribution fee,

the performance fee, the minimum investment amount of a combination of such features. The creation of unit classes is admissible at any time and is within the discretion of the Company. The Company informs the investors on the creation of various unit classes on its homepage (www.ampega.com).

The LOYS Global MH aims at realising the highest possible capital growth.

The active investment strategy provides for investment in attractive securities from all asset classes, with a focus on equities and bonds. The mid-to-long-term investment strategy focuses on undervalued quality securities in the equity and bond markets. A restriction of the investment universe to countries, debtors, industries and the like is not provided for. Derivatives can be used to optimise the investment results. The equity and bond quota of the LOYS Global MH is not limited.

The Fund does not provide a securities index, nor does the company follow a pre-determined benchmark for the Fund. The fund management decides at its discretion actively on the selection of the assets taking into account analyses and valuations of companies as well as economic and political developments. It aims to achieve positive performance.

In addition, the assets admissible pursuant to the Capital Investment Code and the Terms and Conditions of Investment may be acquired for the Fund. These are mainly securities. In addition, an investment in financial instruments and bank deposits as well as other assets set out in the Capital Investment Code and the Terms and Conditions of Investment is also possible. Up to 100% of the Fund's value may be invested in securities. These are essentially equities and bonds. Up to 10% of the Fund's value may be invested in investment units. These are units of equity funds, bond funds and mixed funds which – taking into account the previous sentence – may each amount to up to 100% of the trust units acquired. At the same time, the following investment limit applies:

At least 51% of the Fund's value are invested in equity interests within the meaning of investment tax law.. To this effect, equity interests refer to

- interests in corporations admitted for trading on a stock exchange or admitted to another organised market or included in such market;

- interests in corporations domiciled in a Member State of the European Union or another contracting state to the Agreement on the European Economic Area which are subject to the taxation of revenue for corporations there and are not exempt from such taxation;
- interests in corporations domiciled in a third country which are subject to a taxation of revenue for corporations at a rate of at least 15% there and are not exempt from such taxation;
- interests in other investment funds, either at the rate of the quota of their value published on each valuation day, at which they actually invest in the aforementioned units in corporations or in the amount of the minimum quote specified in the other investment fund's terms of investment.

Up to 49% of the Fund's value may be invested in bank deposits and money market instruments.

Derivatives may be used for purposes of hedging, efficient portfolio management and the generation of additional returns. The value of the maximum potential market risk amounts to 200%.

Consideration of sustainability risks in the investment process as well as effects of sustainability risks on returns

The investments on which this financial product is based do not take into account the EU criteria for environmentally sustainable economic activities. Further information about the way in which sustainability risks are included in the investment process and the possible extent of the effects of sustainability risks on returns can be found on the website of the external asset manager. Corresponding links can be found on the company's home page at <https://www.ampega.com/leistungen/publikumsfonds/hinweise/> (in German).

Transparency of adverse sustainability impacts at fund level

The company does not currently take into account the adverse effects of investment decisions on sustainability factors. The relevant data required to determine and weight the adverse sustainability impacts is not yet available on the market to a sufficient extent and in the required quality.

According to the present legal situation, the Company is free to change the investment policy of the Fund in compliance with the Terms and Conditions of Investment in force from

time to time. The investors are informed on any amendments to the investment policy that might be of a material nature in the annual or semi-annual report.

The risks associated with the investment policy are set out in the “Risk factors - significant risks of investment in a fund” section.

The actual achievement of the objectives pursued with the investment policy cannot be warranted.

Assets

The assets admissible for the Fund described herein are limited to the assets set forth in the Special Terms and Conditions of Investment. See clause 1 of the Special Terms and Conditions of Investment as well as the description of investment limits in this sales prospectus for detailed information.

All assets are described below that the Company may generally acquire for UCITS funds. The representations may differ from the actually acquirable assets.

Securities

The Company may acquire securities of German and foreign issuers for account of UCITS funds,

1. if they are admitted for trading on a stock exchange in a Member State of the European Union (“EU”) or another contracting state to the Agreement on the European Economic Area (“EEA”) or are there admitted to another organised market or included in such market;
2. if they are exclusively admitted for trading on a stock exchange outside the Member States of the European Union or the contracting states to the Agreement on the European Economic Area or admitted there to another organised market or included in such market provided that that the selection of this stock exchange or this organised market is authorised by the Federal Financial Supervisory Authority.

Securities from new issues may be acquired if the admission for trading on or inclusion in any of the stock exchanges or organised markets set out under paras. 1. or 2. must be applied pursuant to the underlying conditions of issue and the securities are admitted for official trading or included in such organised markets within one year after the issue.

Securities as defined above also include

- units in closed-end funds existing in contractual form or in the form of companies that are subject to control by the unit holders (so-called corporate control), i.e. the unit holders must have voting rights with regard to material decisions and be entitled to control the investment policy by means of appropriate mechanisms. Further, the Fund needs to be managed by an entity that is subject to the investor protection provisions unless the Fund has been established in the form of a company and the assets are not managed by another entity.
- Financial instruments that are hedged by other assets or tied to the development of other assets. Insofar as components of derivatives are embedded in such financial instruments, further requirements apply to enable their purchase as securities by the Company.

The securities may only be purchased if the following conditions are fulfilled:

- The potential loss that may arise to the UCITS fund may not exceed the purchase price of the security. There may be no liability for the investor to make additional contributions over and above the initial investment.
- Insufficient liquidity of the security acquired by the UCITS fund must not result in the UCITS no longer being able to comply with the legal requirements for the redemption of units. This applies taking into account the legal possibility of being able to restrict or suspend the redemption of units in special cases (cf. the “Units – Issue and redemption of units” and – “Restriction of unit redemption or suspension of unit redemption” section).– A reliable valuation of the security by exact, reliable and prevailing prices must be available; they must be market prices or provided by a valuation system that is independent of the issuer of the security.
- Appropriate information on the security must be available in the form of providing regular, exact and comprehensive information to the market on the security or an associated portfolio, if any.
- The security is tradeable.
- The acquisition of the security is in line with the investment objectives and/or the investment strategy of the UCITS fund.
- The risks of the security are reasonably dealt with by the risk management of the UCITS fund.

Further, securities may be acquired in the following form:

- Shares that are due to the UCITS fund upon a capital increase from company reserves.
- Securities that are acquired in the exercise of subscription rights belonging to the UCITS fund.

Subscription rights may also be acquired as securities as defined above insofar as the underlying securities can be found in the UCITS fund.

Money market instruments

The Company may invest in money market instruments for account of UCITS funds that are usually traded on the money market as well as in interest-bearing securities which alternatively

- have a maximum maturity respectively residual term to maturity of 397 days at the time of acquisition.
- have a term or residual term of maturity of more than 397 days and the interest payable needs to be adjusted in regular intervals, but at least once in 397 days in line with market conditions and terms and conditions of issue.
- whose risk profile corresponds to that of securities that meet the criterion of residual term to maturity or the criterion of interest adjustment.

Money market instruments may be acquired for UCITS funds:

1. if they are admitted for trading on a stock exchange in a Member State of the European Union or another contracting state to the Agreement on the European Economic Area or are there admitted to another organised European market or included in such market,
2. if they are exclusively admitted for trading on a stock exchange outside the Member States of the European Union or another contracting state to the Agreement on the European Economic Area or are there admitted to another organised market or included in such market insofar as the German Federal Financial Supervisory Authority has approved the selection of such stock exchange or market,
3. if they are issued or guaranteed by the European Communities, the German Federal Government, a special fund of the German Federal Government, a German Federal State, a Member State or other central-state, regional or local authority or the central bank of a Member State of the European Union, the European Central Bank or the European Investment Bank, a third state or, if such entity is a Federal State, a constituent state of such Federal State or an inter-

national public-law institution to which at least one Member State of the European Union belongs,

4. if they are issued by an enterprise whose securities are traded on the markets designated in nos. 1 and 2,
5. if they are issued or guaranteed by a financial institution subject to supervision in accordance with the criteria determined under European Community law or by a financial institution that is subject to and complies with supervisory regulations which, in the opinion of the Federal Financial Supervisory Authority, are equivalent to those of European Community law or
6. if they are issued by other issuers and such issuer is:
 - a) an enterprise with equity of at least EUR10m that prepares and publishes its annual accounts in accordance with the provisions of the European Directive on the annual accounts of companies limited by shares, or
 - b) a legal entity which is responsible within a group of Companies encompassing one or more exchange-listed Companies for the financing of such group, or
 - c) a legal entity that issues money market instruments that are backed by liabilities through the use of a credit line granted by a bank. They are products where loan claims of banks are securitised (so-called asset-backed securities).

All of the aforementioned money market instruments may only be acquired if they are liquid and if their value can be determined exactly at any time. Money market instruments that can be disposed of within a sufficiently short time at limited costs are liquid whereby account is to be taken of the Company's obligation to redeem units of the UCITS fund on the investors' request and to be able to sell such money market instruments within a correspondingly short time. Moreover, an exact and reliable valuation system must exist for the money market instruments that enables the determination of the net asset value of the money market instrument and is based on market data or valuation models (including systems that carry the amortised costs). The liquidity feature is deemed fulfilled for money market instruments if they are admitted to or included in an organised market within the European Economic Area or admitted to or included in an organised market outside the European Economic Area if the Federal Financial Supervisory Authority has approved the selection of this market. This does not apply if the Company has indications that militate against the sufficient liquidity of the money market instruments.

As regards money market instruments that are unlisted or not admitted for trading on a regulated market (see above at nos. 3 to 6), the issue or the issuer of such instruments must, in addition, be subject to provisions pertaining to deposit and investor protection. Appropriate information must be available for such money market instruments that enables an appropriate valuation of the credit risks associated with the instruments and the money market instruments must be freely transferable. The credit risks can, for instance, be valued by means of a credit review conducted by a rating agency.

In addition, the following requirements apply to such money market instruments unless they have been issued or guaranteed by the European Central Bank or the Central Bank of a Member State of the European Union:

- If they are issued or guaranteed by the following bodies (that are, amongst others, set out in no. 3 above):
 - the European Union,
 - the German Federal Government,
 - a special fund of the German Federal Government,
 - a German Federal State,
 - another Member State,
 - another central-state, regional or local authority,
 - the European Investment Bank,
 - a third state or, if the latter is a Federal State, a constituent state of such Federal State
 - an international public-law institution to which at least one Member State of the European Union belongs,
 appropriate information on the issue or the issue programme respectively or the legal and financial situation of the issuer must be available prior to the issue of the money market instrument.
- If they are issued or guaranteed by a financial institution supervised in the European Economic Area (see above at no. 5), appropriate information on the issue or the issue programme respectively or the legal and financial situation of the issuer must be available prior to the issue of the money market instrument that is updated in regular intervals and in the event of significant occurrences. Further, data (e.g. statistics) must be available on the issue or the issue programme respectively that enables an appropriate valuation of the credit risks associated with the investment.
- If they are issued by a financial institution that is subject to supervisory provisions outside the European Economic Area which, in the opinion of the Federal Financial Supervisory Authority, are equivalent to the requirements for fi-

nancial institutions within the European Economic Area, either of the following conditions has to be fulfilled:

- The financial institution is headquartered in a Member State of the Organization for Economic Cooperation and Development (“OECD”) belonging to the so-called Group of Ten (union of the major leading industrial countries - G10).
- The financial institution has at least been rated with a grade that qualifies as a so-called “investment grade”. “Investment grade” means a rating of “BBB” or “Baa” or better pursuant to a credit review by a rating agency.
- It can be proved by means of a thorough analysis conducted by the issuer that the supervisory provisions applicable to the financial institution are at least as strict as those set out in EU law.
- Appropriate information on the issue or the issue programme respectively as well as the legal and financial situation of the issuer must be available for the remaining money market instruments that are unlisted or not admitted for trading on a regulated market (see above at nos. 4 and 6 as well as the remaining instruments at no. 3) prior to the issue of the money market instrument that is updated in regular intervals and in the event of significant occurrences and reviewed by qualified third parties not bound by instructions given by the issuer. Further, data (e.g. statistics) must be available on the issue or the issue programme respectively that enables an appropriate valuation of the credit risks associated with the investment.

Bank deposits

UCITS funds may be invested as bank deposits with a term of no more than twelve months. These deposits are to be held in blocked accounts at a financial institution headquartered in a Member State of the European Union or the European Economic Area. They may also be held at a financial institution headquartered in a third state where, in the view of the Federal Financial Supervisory Authority, the regulatory provisions are equivalent to those set out in EU law.

Investment limits for securities and money market instruments also using derivatives as well as bank deposits

The Company may invest up to 10% of UCITS funds in securities and money market instruments of the same issuer (debtor) whereby the total value of the securities and money market instruments of such issuers (debtors) must not exceed 40% of the UCITS fund. Furthermore, the Company may invest

only 5% of the Fund's value in securities and money market instruments of the same issuer. Securities purchased under repurchase agreements are to be included in this investment limit. The issuers of securities and money market instruments must also be taken into account within the stated limits if the securities and money market instruments they issue are acquired indirectly via other securities in the Fund that are linked to their performance.

The Company may invest only up to 20% of the value of UCITS funds in bank deposits at one financial institution each.

Investment limit for bonds with a special cover assets pool

The Company may invest up to 25% of the value of UCITS funds in mortgage debentures (Pfandbriefe), municipal bonds and in bonds issued by financial institutions headquartered in a Member State of the European Union or a state party to the Agreement on the European Economic Area if the moneys received on the issue of the bonds are invested in assets that adequately cover the liabilities arising from them over the full term of the bonds and that are used with a priority for redemption payments and any interest that falls due should the issuer default. If the Company invests more than 5% of the value of UCITS funds in bonds of the same issuer, the total value of these bonds must not exceed 80% of the value of the UCITS fund. Securities purchased under repurchase agreements are to be included in such investment limits.

Investment limits for public issuers

The Company may invest up to 35% of the value of UCITS funds in debentures, promissory note loans and money market instruments of special public national and supranational public issuers, which include the German Federal Government, the German Federal States, Member States of the European Union or their regional or local authorities, third countries as well as supranational public-law institutions to which at least one Member State of the European Union belongs.

Securities purchased under repurchase agreements are to be included in such investment limits.

Combination of investment limits

The Company may invest a maximum of 20% of the value of UCITS funds in any combination of the following assets:

- securities and money market instruments issued by one and the same institution,

- deposits in such institution, that is, bank deposits
- amounts credited for the counterparty risk associated with the transactions entered into which such institution in derivatives, securities loans and repurchase agreements.

In the case of special public issuers (see section "Investment objectives, investment strategy, principles of investment and investment limits - investment limits for securities and money market instruments also using derivatives as well as bank deposits - investment limits for public issuers"), any combination of the assets mentioned above must not exceed 35% of the value of UCITS funds.

The respective individual limits remain unaffected.

Investment limits using derivatives

The credited amounts of securities and money market instruments of one issuer towards the aforementioned limits may be reduced by the use of standard derivatives whose underlying asset consists of securities or money market instruments of the same issuer. This means that securities or money market instruments of one issuer may be acquired for the account of UCITS funds beyond the limits set out above if the increased issuer risk is reduced again by the hedging transactions.

Other assets and their investment limits

The Company may invest up to 10% of the value of UCITS funds in other assets:

- Securities that are not admitted for trading on a stock exchange or another organised market or included in such market, but basically fulfil the criteria for securities. Notwithstanding the traded and/or admitted securities, the reliable valuation for such securities must be available in the form of a valuation performance in regular intervals that is derived from information provided by the issuer or a competent financial analysis. Appropriate information on the non-admitted or non-included security or, where applicable, the pertinent, that is, the securitised portfolio must be available to the UCITS fund in the form of regular and exact information.
- Money market instruments from issuers that do not meet the requirements set out above provided they are liquid and their value can be determined exactly at any time. Money market instruments that can be disposed of within a sufficiently short time at limited costs are liquid whereby account is to be taken of the Company's obligation to re-

deem units of the UCITS fund on the investors' request and to be able to sell such money market instruments within a correspondingly short time. Moreover, an exact and reliable valuation system must exist for the money market instruments that enables the determination of the net asset value of the money market instrument and is based on market data or valuation models (including systems that carry the amortised costs). The liquidity feature is deemed fulfilled for money market instruments if they are admitted to or included in an organised market within the European Economic Area or admitted to or included in an organised market outside the European Economic Area if the Federal Financial Supervisory Authority has approved the selection of this market.

- equities from new issues if their terms of issue provide that
- their admittance for trading on a stock exchange in a Member State of the European Union or another contracting state to the Agreement on the European Economic Area or their admittance to or inclusion in an organised market in a Member State of the European Union or another contracting state to the Agreement on the European Economic Area has to be applied, or
- their admittance for trading on a stock exchange or admittance to or inclusion in an organised market outside the Member States of the European Union or outside the other contracting states to the Agreement on the European Economic Area has to be applied provided the selection of such stock exchange or organised market has been approved by the Federal Financial Supervisory Authority and they are admitted or included within one year after their issue.
- promissory note loans than can be assigned at least two times after acquisition of UCITS funds and have been granted by any of the following institutions:
 - a) the German Federal Government, a special fund of the German Federal Government, a Federal State, the European Communities or a Member State of the Organization for Economic Cooperation and Development,
 - b) another domestic authority or a regional government or local authority of another Member State of the European Union or another state party to the Agreement on the European Economic Area insofar as the claim can, pursuant to the ordinance on supervisory requirements for financial institutions and securities companies, be treated in the same way as a claim against the central state on whose territory the regional government or the regional or local authority is domiciled,

- c) other entities or public-law institutions domiciled in Germany or any other Member State of the European Union or another state party to the Agreement on the European Economic Area,
- d) enterprises that have issued securities which are admitted for trading on an organised market within the European Economic Area or on another regulated market complying with the essential requirements pertaining the regulated markets within the meaning of the ordinance pertaining to markets for financial instruments as amended, or
- e) other debtors if an authority designated in letters a) to c) has assumed the guarantee for interest and repayment.

Fiscal investment quotas for equity funds/mixed funds

At least 51% of the Fund's value are invested in equity interests within the meaning of investment tax law. To this effect, equity interests refer to

- interests in corporations admitted for official trading on a stock exchange or admitted to another organised market or included in such market;
- interests in corporations domiciled in a Member State of the European Union or another contracting state to the Agreement on the European Economic Area and which are subject to the taxation of revenue for corporations there and are not exempt from such taxation;
- interests in corporations domiciled in a third country which are subject to a taxation of revenue for corporations at a rate of at least 15% there and are not exempt from such taxation;
- interests in other investment funds, either at the rate of the quota of their value published on each valuation day, at which they actually invest in the aforementioned units in corporations or in the amount of the minimum quota specified in the other investment fund's terms of investment.

Investment fund units and their investment limits

The Company may invest up to 10% of the Fund's value in units of target funds provided they are other German and foreign open-end funds. Only up to 20% of the value of UCITS funds may be invested in units of a single target fund. Up to 30% of the value of the Fund may be invested in AIFs. The Company may acquire up to 25% of the issued units of an-other target fund for account of the Fund.

The Company acquires units from various legislations for UCITS funds provided that no relevant restrictions are made in the Special Terms and Conditions of Investment or in the description of the investment policy. In concrete terms, the target funds to be acquired are retail funds, which are acquired from the respective investment management company at the net asset value (NAV) or exchange-traded funds (ETFs) that are traded via a stock exchange or OTC via a market intermediary. Prior to the acquisition, a selection process is undergone, which is firmly anchored in the investment process of the Company. The analysis process contains both quantitative and qualitative elements and, following a strength/weakness analysis, culminates in a total target fund assessment. Among other things, the quantitative analysis module may include the following parameters: size of the fund, performance, cost structure, liquidity etc. The qualitative analysis examines in particular the investment philosophy, investment process and risk management. After a positive total vote, the target fund is acquired taking into account the relevant investment principles and investment limits for the fund.

Pursuant to their terms and conditions of investment, the target funds may invest up to 10% in units of other open-end funds. In addition, the following requirements apply to units in AIFs:

- The target fund must be allowed under regulations that subject it to effective public supervision for the protection of investors and a satisfactory cooperation between BaFin and the supervisory authority in charge of the target fund must be sufficiently guaranteed.
- The level of protection of the investors must correspond to the level of protection of an investor in a German UCITS, particularly with regard to the separation of the management and custody of assets, for borrowing and lending as well as short sales of securities and money market instruments.
- The operations of the Fund must be the subject of annual and semi-annual reports and allow investors to form a judgment on the assets and the liabilities as well as the income and transactions in the period under review.
- The target fund must be a publicly offered fund with an unlimited number of units where investors are entitled to surrender the units.

Investor information upon restriction or suspension of redemption of target fund units

Within the limits of the law, target funds may temporarily restrict or suspend the redemption of units. Then the Company cannot or only limitedly surrender the units in the target fund to the management company or the custodian of the target fund against payment of the redemption price (see also the “Risk factors - risks in connection with an investment in investment fund units” section). The Company’s homepage at <https://www.ampega.com/leistungen/publikumsfonds/hinweise/> states whether and to what extent the Fund holds units in target funds that have currently suspended redemption of units.

Derivatives

The Company may on behalf of UCITS funds enter into transactions with derivatives for hedging purposes and as part of the investment strategy. This includes transactions with derivatives for efficient portfolio management and generating additional yields, i.e. for speculative purposes. This may increase the risk of loss in the Fund, at least temporarily.

A derivative is an instrument whose price is dependent on the price fluctuations or price expectations of other assets (“underlying value”). The following statements relate both to derivatives as well as financial instruments with a derivative component (hereinafter jointly referred to as “Derivatives”).

Through the use of Derivatives the market risk of the UCITS fund will at most double (“market risk limit”). Market risk is the risk of loss that results from fluctuations in the market value of assets held in the UCITS fund that are attributable to changes in variable prices or market rates, such as interest rates, exchange rates, share and commodity prices or changes to the credit rating of an issuer. The Company must comply with the market risk limit at all times. By law it is required to establish the utilisation of the market risk limit every day; these stipulations result from the Ordinance on Risk Management and Risk Measurement in the Use of Derivatives, Securities Lending and Transactions Under Repurchasing Rights in Investment Funds pursuant to the Capital Investment Code (hereinafter the “Derivatives Ordinance”).

To establish the utilisation of the market risk limit the Company uses what is termed the qualified approach as set out in the Derivatives Ordinance. The Company compares the mar-

ket risk of the UCITS fund with the market risk of a virtual comparison fund that contains no Derivatives. The derivative-free reference assets are a virtual portfolio whose value always exactly corresponds to the current value of the Fund, but which does not contain any increases or hedging of the market risk by Derivatives. In other respects, the composition of the reference assets must correspond to the investment objectives and the investment policy that apply to the UCITS fund. The derivative-free reference assets for the **LOYYS Global MH** consist of a portfolio of worldwide equities

Due to the use of Derivatives, the market risk potential of the UCITS fund must not exceed twice the risk amount in relation to the market risk potential of associated derivative-free reference assets at any time.

The market risk of the UCITS fund and the derivative-free reference assets is determined using a suitable risk model (so-called value-at-risk method) whereby the Company records the market price risks arising from all transactions. By using the risk model, it quantifies the change in value of the assets held in the Fund over time. The so-called value at risk indicates a limit for potential losses of a portfolio between two specified points of time which is expressed in monetary units. This change in value is determined by random events, that is, the future trend of market prices and thus is not definitely predictable. The market risk to be determined can only be assessed with a sufficient degree of probability.

Provided that a suitable risk management system is maintained, the Company may invest in any Derivatives for account of the UCITS fund subject to the proviso that the Derivatives are derived from assets that may be acquired for the Fund, or from the following underlying values:

- interest rates
- exchange rates
- currencies
- Sufficiently diversified financial indices that constitute an adequate reference point for the market to which they refer and are published appropriately. These particularly include options, futures and swaps as well as combinations hereof.

Futures contracts

Futures are mutually binding agreements to buy or sell a specific quantity of a specific underlying asset at a specified point in time, the maturity date, or within a specific period at a

price agreed in advance. The Company may buy and sell futures contracts for account of UCITS funds in compliance with the investment principles.

Option dealings

Options involve granting, for a fee (option premium), a third party the right to demand the delivery or receipt of assets during a specified period or at the end of a specific period at a price agreed in advance (strike price), payment of a differential amount or the acquisition of corresponding option rights. The Company may participate in options trading for account of UCITS funds in compliance with the investment principles.

Swaps

Swaps are exchange contracts in which the payment flows or the risks underlying the transaction are exchanged between the contracting parties. Amongst others, the Company may enter into interest swaps, currency swaps, equity swaps and credit default swaps for account of UCITS funds in compliance with the investment principles.

Swaptions

Swaptions are options on swaps. A swaption is the right, but not the obligation, to enter into a swap with precisely defined conditions at a specific point in time or within a specific period. The principles set out in connection with option dealings apply accordingly. The Company may only enter into swaps for account of UCITS funds which are composed of the options and swaps described above.

Credit Default Swaps

Credit default swaps are credit Derivatives that enable the amount of a potential credit default to be transferred to third parties. In return for taking on the credit default risk, the seller of the risk pays a premium to its contracting partner. The statements relating to swaps apply accordingly.

Total Return Swaps

Total return swaps may be effected for UCITS funds. Total return swaps are Derivatives in which all income and fluctuations in value of an underlying asset are exchanged at an agreed fixed interest payment. One contracting party, that is, the protection purchaser, thus transfers the entire credit and market risks from the underlying value to the other party, the security guarantor. In return, the protection purchaser pays a premium to the security guarantor.

The Company may effect total return swaps for the Fund for hedging purposes and as part of the investment strategy. Basically, all assets acquirable for the Fund may be the subject of total return swaps. Up to 100% of assets may be the subject of such transactions. The Company expects that in individual cases, no more than 50% of its assets are the subject of total return swaps. However, this is only an estimated value that can be exceeded in individual cases. Income from total return swaps - net of transaction costs - completely accrues to the Fund.

The contracting parties for total return swaps are selected according to the following criteria:

- price of the financial instrument,
- costs of execution,
- speed of execution,
- probability of execution or settlement,
- the extent and nature of the order,
- time of order,
- Other factors influencing the execution of the order (among others financial soundness of the counterparty)

The criteria may be weighted differently depending on the type of the trading order.

Securitised financial instruments

The Company may also acquire the above financial instruments for account of the UCITS fund if they are securitised. The transactions based around financial instruments may also be only partially securitised (e.g. bonds with warrants). The statements on opportunities and risks apply accordingly to such securitised financial instruments, albeit with the stipulation that, in the case of securitised financial instruments, the risk of loss is limited to the value of the security.

OTC derivative transactions

The Company may enter both into derivative transactions for account of UCITS funds that are admitted for trading on a stock exchange or are included in another organised market, as well as what are termed over-the-counter (OTC) transactions. The Company may only enter into Derivatives transactions that are not admitted for trading on a stock exchange or admitted for trading or included in another organised market with suitable financial institutions or financial services institutions on the basis of standardised framework agreements. In the case of Derivatives that are traded off-market, the coun-

terparty risk of a contract party is limited to 5% of the value of UCITS funds. If the contracting party is a financial institution that is headquartered in the European Union, another state party to the Agreement on the European Economic Area or a third state subject to a corresponding level of supervision, the counterparty risk may total up to 10% of the value of UCITS funds. Derivatives traded off-market that are entered into with a central clearing house of a stock exchange or another organised market as counterparty are not included in the counterparty limits if the Derivatives are subject to a daily valuation at market rates with a daily margin settlement. However, claims by the UCITS fund against an intermediary shall be included in the limits even if the derivative is traded on a stock exchange or another organised market.

A list of the contracting parties with whom OTC transactions may generally be concluded for UCITS funds (according to the respective contractual basis) can be viewed on the Company's website at <https://www.ampega.com/leistungen/publikumsfonds/hinweise/> (in German).

Securities lending operations

The UCITS fund securities, money market instruments and investment units may be loaned to third parties for a fee in line with market conditions. The contracting parties for lending operations are selected according to the following criteria:

- price of the financial instrument,
- costs of execution,
- speed of execution,
- probability of execution or settlement,
- the extent and nature of the order,
- time of order,
- other factors influencing the execution of the order (amongst others, financial soundness of the counterparty)

The criteria may be weighted differently depending on the type of the trading order. The entire securities, money market instrument and investment unit portfolio of the UCITS fund can hereby be transferred to third parties as loan on securities for an indefinite period. The Company expects that, as a rule, no more than 50% of fund assets are subject to lending transactions. However, this is only an estimated value that may be exceeded in individual cases. The Company has the right to terminate the lending transaction at any time. It shall be agreed contractually that securities of the same type, quality and amount are to be retransferred to the UCITS fund on expi-

ry of the lending transaction within the customary transaction period. The prerequisite for the transfer by way of loan is that adequate security is granted to the UCITS fund. For this purpose credit balances may be assigned, as may securities or money market instruments. The returns from the investment of the securities shall accrue to the UCITS fund.

The borrower shall further be required to pay to the custodian bank the interest accruing on the securities, money market instruments or investment units loaned as it falls due for account of the UCITS fund. The total of all securities, money market instruments or investment units transferred to a borrower must not exceed 10% of the value of UCITS funds.

The manner of custody of the loaned assets is in the discretion of the borrower.

The Company may involve an organised system for providing and handling securities loans. In settlement of securities loans through organised systems, the securities transferred to a borrower may exceed 10% of the Fund's value.

The loan transactions described here are effected to provide the Fund with additional income through the fee to be paid by the borrower.

The securities loans transactions are carried out by the Company itself without the involvement of external service providers.

The Company must not make cash loans to third parties for account of UCITS funds.

Repurchase agreements

The Company may enter into securities repurchase agreements with financial institutions and financial services institutions with a maximum term of twelve months for account of UCITS funds whereby it may transfer securities, money market instruments or investment units of the UCITS fund to a cash lender (repurchase agreement) and securities, money market instruments or investment units in compliance with the investment limits in force from time to time (reverse repurchase agreement). The Fund's entire portfolio of securities, money market instruments and investment units may be transferred to third parties on a repurchase agreement. The Company expects that, as a rule, no more than 50% of fund

assets are subject to repurchase transactions. However, this is only an estimated value that can be exceeded in individual cases. The Company is able to terminate the repurchase agreement at any time; this does not apply to repurchase agreements having a term of up to one week. If a repurchase agreement is terminated, the Company is entitled to claim back the securities, money market instruments or investment units sold under the repurchase agreement. The termination of a reverse repurchase agreement may either result in a reimbursement of the full sum of money or the accrued sum of money that amounts to the current market value. Repurchase transactions are only permissible in the form of "genuine" repurchase agreements. The transferee takes on the obligation to retransfer the securities, money market instruments or investment units at a specified point in time or at a point to be specified by the transferor or to repay the amount including interest.

The assets held under repurchase agreements will be deposited with the custodian of the Fund in a separate deposit (blocked account). The way the custody of the assets sold under repurchase agreements is in the discretion of the borrower.

Repurchase agreements are entered into to generate extra return for the Fund (reverse repurchase agreement) or to provide temporary additional liquidity in the Fund (simple repurchase agreement).

The Company will enter into the repurchase agreements without the involvement of external service providers.

Collateral strategy

In the scope of derivatives, securities lending and repurchase transactions, the Company also accepts collateral on the Fund's account. The collateral serves to fully or partly reduce the default risk of the contract partner in these transactions.

The Company has established an internal policy ("Collateral Policy") containing a description of the minimum requirements regarding the permissible collateral and its evaluation. Here, features such as the financial soundness of the issuer, the term of the eligible bonds, currency and price volatility are taken into account.

Types of permissible collateral

The Company accepts the following assets as collateral for Derivative / securities lending / repurchase transactions:

- Cash in EUR
- High-quality bonds issued by the German government, a German Federal State, the European Union, a Member State of the European Union or its local authorities, another state party to the Agreement on the European Economic Area or a third country, provided they are included in the internal directive
- Government bonds from OECD countries, provided they are included in the internal directive
- Bonds from first-class issuers with adequate liquidity or listing on a regulated market of a Member State of the European Union or a stock exchange of an OECD Member Country, provided they are contained in a main index and included in the internal directive.

Collateral provided by a contracting party must, inter alia, be subject to appropriate risk diversification with respect to issuers. If several contracting parties provide securities of the same issuer, they are to be aggregated. If the value of the securities provided by one or more contracting parties of the same issuer does not exceed 20% of the Fund's value, diversification is considered appropriate. Diversification is also adequate if this limit is exceeded, if the Fund, in this respect, is only granted securities or money market instruments of the following issuers or guarantors:

Securities or money market instruments of the German Federal Government, a German Federal State, another Member State of the European Union or its regional or local authorities, another State party to the Agreement on the European Economic Area or regional or local authorities of that State, a third country or an international organisation to which the German Federal Government, another Member State of the European Union or any other state party to the Agreement on the European Economic Area belongs.

If all securities provided consist of securities or money market instruments of such issuer or guarantor, these securities must have been issued within the framework of at least six different issues. The value of the securities or money market instruments issued as part of the same issue must not exceed 30% of the Fund's value.

Scope of collateralisation

Securities lending transactions are collateralised in full. The market value of the securities transferred as a loan along with the associated yields comprises the collateral value. The provision of the collateral by the borrower may not be less than the collateral value plus a standard market uplift.

Further, Derivatives, securities lending and repurchase transactions must be collateralised to a level that ensures that the attributable amount for the default risk of the respective contract partner does not exceed five percent of the value of UCITS funds. If the contracting party is a financial institution headquartered in a Member State of the EU or another state party to the Agreement on the EEA or in a third state in which equivalent supervisory provisions apply, the attributable amount for the default risk may be ten percent of the value of the Fund.

Evaluation of collateral and strategy for valuation write-downs (haircut strategy)

Haircuts refer to write-downs to the current market value of the collateral. The haircuts to be used are based on internal guidelines of the management company regarding the collateral strategy in the transaction with OTC Derivatives and securities loans. The strategy takes into account features such as the credit rating of the issuer, the term of the permissible loans, the currency and the price volatility. No haircut is applied to cash collateral.

As the residual maturity increases, larger haircuts are applied to the market value of the collateral securities:

Residual maturity	Haircut
Up to 1 year	2 to 3%
2 to 5 years	3 to 4%
5 to 10 years	5 to 8%
10 to 30 years	10 to 20%
More than 30 years	Not admissible as security

The hedged items and collateral received are subject to a daily market valuation and a daily margin settlement if the minimum transfer amounts of EUR250,000 agreed with the counterparties are exceeded.

Irrespective of the quality of the collateral furnished or, in the case of re-investments, of the assets purchased, the Fund is exposed to a risk of loss if the price of the collateral fluctuates

more widely than was assumed when the haircut was fixed or the issuer or counterparty of the collateral received becomes insolvent.

Investment of cash collateral

Cash collateral in the form of bank balances may be held in blocked accounts at the custodian institution of UCITS funds or, with their consent, at a different financial institution. Reinvestment may only be made in high-quality government bonds or in money market funds with a short term structure. Additionally, cash collateral may be invested in a reverse transaction under repurchase agreements with a financial institution, provided the return of the accumulated credit is guaranteed at any time.

Custody of securities as collateral

The Company may accept securities as collateral under Derivatives, securities lending and repurchase agreements for account of UCITS funds. If these securities were transferred as collateral, they must be held in custody with the custodian. If the Company has obtained the securities under Derivatives transactions pledged as collateral, they can also be kept in custody with another body that is subject to effective public supervision and independent of person providing security. Re-use of the securities is not permitted.

Borrowing

The raising of short-term credit for the collective account of the investors is permitted up to 10% of the value of UCITS funds, provided the loan is made on standard market terms and the custodian institution approves the borrowing.

Leverage

Leverage refers to each method by which the Company increases the investment level of the Fund. Such methods particularly include the entry into securities lending, repurchase agreements as well as the acquisition of Derivatives with embedded leveraged finance. The Company may use such methods for the Fund to the extent described in this sales prospectus. The option of using Derivatives and entering into securities lending transactions and repurchase agreements is described in the section "Investment objectives, investment

strategy, principles of investment and investment limits - assets – derivatives - or securities lending transactions and repurchase agreements". The option for taking on loans is explained in the section "Investment objectives, investment strategy, principles of investment and investment limits - borrowing".

Through the application of the methods described above, the company may at most double the market risk of the Fund ("market risk limit", cf. section "Investment objectives, investment strategy, principles of investment and investment limits - assets - Derivatives"). It limits the use of leverage in the Fund.

Additionally, pursuant to section 35 (6) of the Derivatives Ordinance, the Company calculates the leverage by dividing the overall exposure of the Fund by its net asset value. The total exposure of the Fund is calculated by adding the net asset value of the Fund to all nominal amounts of the derivative transactions used in the Fund.

The leverage of the Fund is calculated as the ratio between the risk of the Fund and its net asset value. The calculation of the net asset value is explained in the section "Units", sub-section "Issue price and redemption price". The risk of the Fund is calculated using a gross method. It is the sum of the absolute values of all positions of the Fund, except bank deposits, which are valued according to legal requirements. It is not permitted to offset individual derivative transactions or securities positions (i.e. no consideration of so-called netting and hedging agreements). Any effects from the reinvestment of collateral in securities lending and transactions and repurchase agreements are taken into account here. The Company expects that the risk of the Fund, as calculated by the gross method, will not exceed its net asset value by more than three times.

However, depending on market conditions, leverage may fluctuate so that, despite continued monitoring by the Company, the targeted level may be exceeded.

Valuation

General rules for valuing assets

Assets admitted for trading on a stock exchange / traded on an organised market

Assets that are admitted for trading on stock exchanges or are admitted to or included in another organised market and subscription rights for the Fund shall be valued at the last available tradeable price that permits a reliable valuation, unless contrary provisions are made in the section “Special valuation rules relating to individual assets”.

Assets not listed on stock exchanges or traded on organised markets or assets without a tradeable price

Assets that are neither admitted for trading on stock exchanges nor are admitted to or included in another organised market, or for which no tradable price is available, shall be valued at the current market value that is appropriate on careful assessment using suitable valuation models and taking current market conditions into account, unless contrary provisions are made in the section “Special valuation rules relating to individual assets”.

Special valuation rules relating to individual assets

Unlisted bonds and promissory note loans

Bonds that are not admitted to a stock exchange or admitted to or included in an organised market (e.g. unlisted bonds, commercial papers and certificates of deposit) and promissory note loans are valued using the prices agreed for comparable bonds and promissory note loans, and if required the market values of bonds from comparable issuers with a corresponding term and interest rate, where relevant with a discount to account for the lower saleability.

Option rights and futures contracts

The option rights and liabilities belonging to the Fund that arise from option rights granted to a third party that are admitted for trading on a stock exchange or another organised market or are included in such market are valued at the last available tradeable price that enables a reliable evaluation.

The same applies to receivables and liabilities arising from futures contracts sold for account of the Fund. Margins deposit-

ed on behalf of the Fund are counted towards the value of the Fund taking into account the valuation gains and losses determined on the trading day.

Bank deposits, fixed deposits, investment fund units and loans

Bank deposits are always valued at their nominal value plus interest accrued.

Fixed deposits are valued at the market value provided the fixed deposit can be terminated at any time and repayment on termination is not at the nominal value plus interest.

Units in investment funds are always valued at their last determined redemption price or at the last tradable price that permits a reliable valuation. If these values are not available, units in investment funds are valued at the current market value that is appropriate based on careful assessment using suitable valuation models taking into account current market conditions.

The market value from time to time of assets transferred by way of loan shall be material for repayment claims from lending transactions.

Assets denominated in foreign currencies

Assets denominated in foreign currencies are translated into euros on the basis of the relevant exchange rate of the previous day. The relevant exchange rate used is the 4:00 p.m. fixing (London time).

Sub-funds

The Fund is not a sub-fund in an umbrella construction.

Risk factors

Before taking the decision to buy units in the Fund, investors should carefully read the following risk factors along with the other information contained in this sales prospectus and incorporate them into their investment decision. The occurrence of one or more of these risks may in itself or in conjunction with other circumstances have a negative impact on the performance of the Fund or the assets held in the Fund and therefore also negatively affect the unit value.

If the investor sells Fund units at a point at which the price of the assets included in the Fund is less than the price at the point at which they were acquired, the investor would not recoup the money invested in the Fund at all or in full. The investor could lose its capital invested in the Fund in part or in full. Increases in value cannot be guaranteed. The investor's risk is limited to the sum invested. There is no liability for the investor to make additional contributions over and above the initial investment.

Alongside the risks and uncertainties described below or elsewhere in the sales prospectus, the performance of the Fund may be compromised by various other risks and uncertainties that are not currently known. The order in which the following risks are listed reflects neither the probability of their occurrence nor the scope nor significance of individual risks occurring.

Risks of investment in a fund

The risks that are typically associated with investing in a UCITS are set out below. These risks may have a negative effect on the unit value, on the capital invested by the investor and the investor's planned holding period of the fund investment.

Fluctuation of the fund unit value

The fund unit value is calculated from the value of the Fund divided by the number of units put into circulation. The value of the Fund corresponds to the sum of all market values of all assets in the Fund less the sum of the market values of all liabilities of the Fund. The fund unit value is therefore dependent on the value of the Fund assets held in the Fund and the level of the Fund's liabilities. If the value of these assets falls or the value of the liabilities rises, the fund unit value decreases.

Influencing individual income through tax aspects

The fiscal handling of capital gains depends on the individual circumstances of the respective investor and may be subject to change in future. Investors should contact their personal tax advisors if they have any specific questions - in particular taking account of individual tax circumstances.

Amendment of investment policy or terms and conditions of investment

The Company may amend terms and conditions of investment with the approval of the Federal Financial Supervisory Authority. This may also affect investor rights. By amending the Terms and Conditions of Investment, for example, the Company may change the investment policy of the Fund or it may increase the costs charged to the Fund. The Company may further amend the investment policy within the investment spectrum permissible at law and contractually and thus without amending the terms and conditions of investment and their approval by the Federal Financial Supervisory Authority. This may also alter the risk associated with the Fund.

Restriction on unit redemption

The Company may restrict the redemption of units for a total of up to 15 consecutive working days if the surrender requests from investors on a settlement date exceed a previously defined threshold above which the surrender requests can no longer be carried out in the interest of all investors due to the liquidity situation of the Fund. If the threshold is reached or exceeded, the Company decides freely after a due assessment of the circumstances whether to restrict the redemption on this settlement date. If it decides to restrict the redemption, it may continue this on the basis of a daily discretionary decision for up to 14 consecutive working days. If the Company has decided to restrict the redemption of units, it will only redeem units proportionally at the redemption price applicable on the settlement date; otherwise the redemption obligation does not apply. This means that every redemption request will only be carried out proportionally on the basis of a quota determined by the Company. The unexecuted part of the order will not be executed at a later point in time, but will expire. For the investor, there is therefore a risk that his or her order to surrender units will only be partially executed and the remaining open order will have to be placed again.

Suspension of unit redemption

The Company may temporarily suspend the redemption of units in the event of extraordinary circumstances that render such suspension necessary, taking into account the investors' interests. Extraordinary circumstances in this sense may include economic or political crises, an unusual extent of redemption demands and the closure of stock exchanges or markets, trading restrictions or other factors that hamper determination of the unit value. In addition, the Federal Finan-

cial Supervisory Authority may order that the Company suspend redemption of the units if this is required in the interest of the investors or in the public interest. The investor may not redeem his units during this period. The unit value may also fall during a period of suspension of unit redemption, e.g. if the Company is forced to sell assets below market value during the suspension of unit redemption. On resumption of unit redemption, the unit value may be lower than prior to suspension of redemption. Without further resumption of redemption of units, a suspension may immediately be followed by a liquidation of the Fund, for example, if the Company announces the management of the Fund and then liquidates the Fund. Therefore, there is a risk for investors that it cannot realise the planned holding period and that essential parts of the capital invested are indefinitely unavailable or get lost altogether.

Liquidation of the Fund

The Company is entitled to terminate the management of the Fund. After terminating its management, the Company may fully liquidate the Fund. The right of disposal over the Fund shall pass to the custodian institution after a notice period of six months. The risk for investors is therefore that they may not be able to comply with the holding period. On transfer of the Fund to the custodian institution the Fund may be subject to taxes other than German income taxes. If on completion of the liquidation process the Fund units are retired from the investor's custody account, the investor may be subject to income tax.

Transfer of all Fund assets to a different open-end fund (merger)

The Company may transfer all Fund assets to a different UCITS. In this case the investor may (i) redeem his units, (ii) retain them and become an investor in the acquiring UCITS, (iii) or exchange them for units in an open-end fund with comparable investment principles provided the Company or an affiliated company manages such an investment fund with comparable investment principles. This applies equally if the Company transfers all assets from a different open-end fund into the Fund. In the course of the transfer the investor therefore must take a new, early investment decision. Tax on gains may be due if the units are redeemed. Where units are exchanged for units in an investment fund with comparable investment principles, the investor may be subject to tax for instance if the value of the units received is higher than the old units at the point of acquisition.

Transfer of the Fund to another management company

The Company may transfer the Fund to another management company. The Fund as well as the position of the investor therefore remain unchanged. However, as part of the transfer, the investor must decide if he considers the new management company as appropriate as the previous one. If he does not want his capital to remain invested in the Fund under a new management, he must redeem his units. Here, income taxes may accrue.

Profitability and meeting the investment objectives of the investor

There is no guarantee that the investor will achieve his desired investment success. The unit value of the Fund may fall and result in losses to the investor. There are no guarantees from the Company or third parties in respect of a specific minimum payment commitment on redemption or of a specific level of investment success of the Fund. Thus, investors may receive an amount less than the amount initially invested. A front-end fee levied on units or a redemption fee charged on the sale of assets may also reduce or even cancel out the success of an asset over a short investment term.

Dealing with sustainability risks

Sustainability risks are events or conditions in the areas of the environment, social affairs or corporate governance the occurrence of which may actually or potentially have a significant negative impact on the financial position, cash flows and financial performance as well as the reputation of the investments and can thereby be influenced in their market value.

The company regards sustainability risks as a supplementary type of risk, which affects already known and anchored types of risk, such as market price risk, credit default risk, reputational risk or operational risk.

Risks of negative performance of the Fund (market risk)

The risks associated with investment by the Fund in individual assets are set out below. These risks may affect the performance of the Fund or the assets held in the Fund and thus have a negative impact on the unit value and the capital invested by the investor.

Value change risks

The assets in which the Company invests on the Fund's account are subject to risks. Losses of value may occur if the market value of the assets falls as compared to the acquisition price, or if spot and forward prices develop differently.

Capital market risk

The performance of financial products in terms of price or market value is dependent in particular on the performance of the capital markets, which in turn are influenced by the general state of the global economy and the economic and political outline conditions in the respective countries. Irrational factors, such as moods, opinions and rumours, may also affect the general price development. Fluctuations of the prices or market values can also be due to changes of interest rates, exchange rates or the financial soundness of an issuer.

Risk of a change of share prices

Experience has shown that equities are subject to strong price fluctuations and thus to a risk of declines in prices. Such price fluctuations are particularly influenced by the development of the profits generated by the issuing company as well as the development of the industry and the entire economy. The market participants' confidence in the respective company can also be influenced by the price performance. This applies particularly to companies whose shares have been admitted for trading on the stock exchange or another organised market only for a short time. Even slight changes to forecasts might lead to strong price fluctuations there. If the portion of freely tradeable shares held by many shareholders (so-called widespread shareholdings) is small, even small buying and selling orders may have a strong impact on the market price and thus lead to higher price fluctuations.

Interest rate risk

Investment in fixed-interest securities runs the opportunity that the market interest rate that applies at the time a security is issued can change. If the market interest rate increases as compared to the interest rate at the point of issue, the price of the fixed-interest securities usually falls. However, if the market interest rate falls, the price of fixed-interest securities increases. This price performance leads to a situation where the current return on a fixed-interest security is about the same as the current market interest rate. However, different price fluctuations occur depending on the (residual) term of the fixed-interest security. Fixed-interest securities with short

terms have lower interest rate risks than fixed-interest securities with longer terms. Conversely, fixed-interest securities with short terms produce lower returns than fixed-interest securities with longer terms. Money market instruments tend to bear lower rate risks due to their short term of a maximum of 397 days. In addition, the development of the interest rates of various interest-related financial instruments with a comparable residual term that are expressed in the same currency may vary.

Risk of negative credit interest

The Company invests cash of the Fund with the custodian or other banks for the account of the Fund. An interest rate is partly agreed for these bank deposits that corresponds to the European Interbank Offered Rate (Euribor) minus an applicable margin. If the Euribor falls below the agreed margin, this leads to negative interest rates in the relevant account. Depending on the development of the interest rate policy of the European Central Bank, both short-term, medium-term and long-term bank deposits may achieve a negative interest yield.

Risk of a change of prices of convertible bonds and bonds with warrants

Convertible bonds and bonds with warrants give the right to convert the bond into shares or to acquire shares. Therefore, the performance of convertible bonds and bonds with warrants depends on the trend of the share price as underlying value. As a result, the performance risk of the underlying shares can also affect the performance of the convertible bond and bond with warrants. Bonds with warrants that grant the issuer the right to offer a number of shares specified in advance (reverse convertibles) to the investor instead of a repayment of the nominal value are increasingly dependent on the corresponding share price.

Risks associated with Derivatives trading

The Company may enter into derivative transactions for the Fund. The purchase and sale of options as well as the entering into of futures contracts or swaps are associated with the following risks:

- The use of derivatives may result in losses that are unpredictable and may even exceed the amounts used for the derivative business.
- Changes in price of the underlying asset may reduce the value of an option or future. If the value decreases, the

Company may be obliged to let the acquired rights lapse. The Fund may also suffer losses due to changes in value to the asset value underlying a swap.

- The leveraging function of options can affect the value of the Fund assets more than is the case with the direct acquisition of the underlying assets. The risk of loss may be indeterminable at the point the transaction is entered into.
- There may not be a liquid secondary market for a specific instrument at a given point in time. In that case it may not be possible to neutralise (close) a position in Derivatives.
- The purchase of options runs the risk of the option not being exercised because the prices of the underlying assets do not develop as expected, meaning that the option premium paid by the Fund is forfeited. When trading in options there is a risk that the Fund is obliged to accept assets at a price higher than the market price or to supply assets at a price lower than the market price. The Fund thereby suffers a loss of the difference in price less the option premium received.
- With futures contracts there is a risk that the Company is obliged, on the Fund's account, to bear the difference between the base price used when the contract was entered into and the market price at the point the transaction is closed or falls due. The Fund would thereby incur losses. The risk of loss cannot be determined on conclusion of the futures contract.
- There are costs associated with entering into any hedging transaction (closing) that may be required.
- The forecasts made by the Company on the future development of underlying assets, interest rates, rates and foreign exchange markets may turn out to be incorrect in retrospect.
- It may not be possible to buy or sell the assets underlying the Derivatives at a favourable time or it may be necessary to buy or sell them at an unfavourable time.

The following risks may arise with off-exchange transactions (over-the-counter, OTC):

- There may not be an organised market, meaning that the Company may find it difficult or even impossible to sell the financial instruments acquired on the Fund's account.
- Depending on the individual agreement, it may be difficult, impossible or very costly to enter into an offsetting transaction (closing).

Risks with securities lending transactions

If the Company grants a loan over securities on the Fund's account, it transfers these to a borrower who, at the end of the transaction, transfers back securities of the same type, quantity and quality (securities lending). For the duration of the transaction the Company has no ability to dispose over the loaned securities. If the security's value falls during the transaction and the Company wishes to sell the security as a whole, it must terminate the lending transaction and await the standard settlement cycle, which may give rise to a risk of loss for the Fund.

Risks with repurchase transactions

If the Company sells securities under repurchase agreements, it sells them and undertakes to buy them back with an uplift at the end of the term. The repurchase price plus uplift to be paid at the end of the term by the seller is determined when the transaction is entered into. If the securities sold under repurchase agreements lose value during the term of the transaction and the Company wishes to sell them to limit losses in value, it may only do so by exercising the right of early termination. Early termination of the transaction may involve financial losses to the Fund. Further, it may also transpire that the uplift to be paid at the end of the term is higher than the yields achieved by the Company reinvesting the cash received.

If the Company buys securities under repurchase agreements, it buys these and must resell them at the end of the term. The repurchase price is determined when the transaction is entered into. The securities bought under repurchase agreements are deemed collateral for the provision of the liquidity to the contracting partner. Any increase in value of the securities will not benefit the Fund.

Risks connected with the receipt of collateral

The Company receives collateral for derivative, securities lending and repurchase transactions. The value of Derivatives, loaned securities or securities sold under repurchase agreements may rise. In that case the collateral furnished may not be sufficient to cover the full level of the Company's delivery or re-transfer claim vis-a-vis the counterparty.

The Company may invest cash collateral in blocked accounts, in high-quality government bonds or in money market funds with a short-term structure. The financial institution at which the bank deposits are held may fail. Bonds and money market

funds may develop negatively. At the end of the transaction the invested collateral may no longer be available to the full extent although the Company, on the Fund's behalf, is required to return the amount originally granted. In that case the Company would be obliged to compensate the loss incurred.

Risk with securitisation positions without a retention level

The Fund may only acquire securities that securitise exposures (securitisation positions) issued after 1 January 2011 if the debtor retains at least 5 percent of the volume of the securitisation (retention level) and complies with further stipulations. The Company is therefore obliged, in the interest of the investors, to initiate remedial measures if the Fund assets include securitisations that do not comply with these EU standards. As part of the remedial measures the Company may be obliged to sell such securitisation positions. Because of legal requirements for banks, fund companies and insurers, there is a risk that the Company may not be able to sell such securitisation positions held in the Fund, or may only be able to do so at a substantial discount or with a long time delay.

Inflation risk

Inflation poses a risk of devaluation for all assets. This also applies to the assets held in the Fund. The rate of inflation may lie above the growth of the Fund.

Currency risk

Fund assets may be invested in currencies other than the Fund currency. The Fund receives the returns, repayments and revenues from such investments in the other currency. If the value of this currency falls in relation to the Fund currency, the value of such investments falls, and as a consequence so does the value of the Fund assets.

Concentration risk

If there is a concentration of investment in certain assets or markets, the Fund is highly dependent on the development of these assets or markets.

Risks connected with investment in investment units

The risks posed by units in other investment funds that are acquired for the Fund ("target funds") are closely associated with the risks of the assets contained within these target funds and the investment strategies pursued by them. As the managers of the individual target funds act independently of

one another, it may be the case that several target funds pursue the same or opposing investment strategies. This can compound existing risks and possible opportunities may cancel each other out. The Company is not normally able to influence the management of the target funds. There is no requirement for their investment strategies to accord with the Company's assumptions or expectations. In many cases the Company will not be aware of the current composition of the target funds at any given time. If their composition does not comply with its assumptions or expectations, it may only be able to act with a considerable delay by redeeming the target fund unit.

Open-end funds in which the Fund acquires units may further temporarily restrict or suspend redemption of the units. This would prevent the Company from selling the units in the target fund by redeeming them with the management company or custodian institution of the target fund for the redemption price.

Risks relating to the investment spectrum

In compliance with the principles of investment and the investment limits required by law and the terms and conditions of investment, which provide a very broad framework for the Fund, the actual investment policy may also aim to mainly acquire assets of e.g. only a few sectors, markets or regions/countries. This concentration on a few specific investment sectors may be associated with risks (e.g. narrowness of the market, wide fluctuation range within certain economic cycles). The annual report provides information on the terms of the investment policy retrospectively for the previous year under report.

Risks of limited or increased liquidity of the Fund and risks arising in connection with increased subscriptions or redemptions (liquidity risk)

Liquidity risk is the risk that a position in the portfolio of the investment fund cannot be sold, liquidated or closed within a sufficiently short period at limited costs and that this impairs the investment fund's ability to satisfy the requirements for satisfying the redemption demand pursuant to the Capital Investment Code or other payment obligations.

The risks that may impair the Fund's liquidity are set out below. This may result in a situation where the Fund is temporarily or permanently unable to meet its payment obligations or that the Company is temporarily or permanently unable to satisfy investors' redemption demands. The investor may not comply with the planned holding period and may not have the invested capital or parts thereof at his disposal for an indeterminate period. The realisation of the liquidity risk may further reduce the value of the Fund's assets and thus the unit value, for example if the Company is forced to sell assets for the Fund below the market value, provided this is permissible by law. If the Company is unable to meet the redemption requests of investors, this can also lead to the restriction or suspension of redemption and in extreme cases to the subsequent liquidation of the Fund.

Risk of investing in assets

Assets that are not admitted to a stock exchange or are admitted or included in another organised market may also be acquired for the Fund. It may only be possible to sell these assets on at a substantial discount, with a time delay, or possibly not at all. Even listed assets may only be able to be sold at a substantial discount or not at all depending on the market situation, the volume, the time frame and the planned costs. Although only assets that can be liquidated at any time may be acquired for the Fund, it cannot be ruled out that these may temporarily or permanently only be saleable at a loss.

Risk from borrowing

The Company may take out loans on the Fund's account. Loans with a variable interest rate may have a negative impact on the Fund's assets if interest rates rise. If the Company has to repay a loan and is unable to settle it through follow-up financing or liquidity available in the Fund, it may be forced to sell assets earlier or on worse terms than planned.

Risks from increased redemptions or subscriptions

Purchase and sale orders from investors increase and decrease the liquidity of Fund assets. On balancing, the inflows and outflows may result in a net inflow or outflow of liquid funds to the Fund. This net inflow or outflow may cause the Fund manager to buy or sell assets, giving rise to transaction costs. This applies in particular if, as a result of inflows or outflows, a quota of liquid funds set by the Company for the Fund is undershot or exceeded. The transaction costs incurred are charged to the Fund and can impair the performance of the

Fund. In the case of inflows, increased Fund liquidity may have a negative impact on the performance of the Fund if the Company is unable to invest the funds at adequate terms at all or at short notice.

Risk of holidays in certain regions/countries

The investment strategy requires investments for the Funds to be made in particular in specific regions/countries. Local holidays in these regions/countries may give rise to deviations between the trading days on the stock exchanges of these regions/countries and valuation dates of the Fund. On a day that is not a valuation day the Fund may not be able to react to market developments in the regions/countries on the same day, or it may not be able to trade on the market there on a valuation day that is not a trading day in those regions/countries. This could prevent the Fund from selling assets in the required time. This may have a negative impact on the Fund's ability to meet its redemption obligations or other payment obligations.

Counterparty risk including credit and receivable risk

Counterparty risk is the risk of loss for an investment fund that results from the fact that the counterparty of a transaction may not be able to satisfy its obligations relating to settling payment obligations.

The risks that may arise for the Fund in the scope of a business relation with another party (known as counterparty) are set out below. There is a risk that the contract partner may no longer be able to meet its obligations. This may affect the performance of the Fund and thus also have a negative impact on the unit value and the capital invested by the investor.

The above-described risk of default by counterparties and related losses for the Fund is particularly applicable to the Fund to the extent total return swaps or other Derivatives are used for the Fund, which have a significant impact on the investment strategy.

Counterparty risk (except for central counterparties)

The Fund may suffer losses if an issuer (hereinafter: the "Issuer") or counterparty (hereinafter: the "Counterparty") defaults against whom the Fund has claims. Issuer risk describes

the effect of the specific developments at the respective Issuer that, alongside the general tendencies of the capital markets, affect the price of a security. Even where securities are carefully selected, losses arising as a result of the financial collapse of an Issuer cannot be ruled out. The counterparty risk also includes the risk of the party to a mutual contract not being able to meet its own payment obligations in full or in part (counterparty risk). This applies to all contracts that are entered into for account of the Fund.

Risk from central Counterparty

A central Counterparty (CCP) acts for the Fund as an intermediate institution for certain transactions, in particular for transactions relating to derivative financial instruments. In this case it acts as the buyer vis-a-vis the seller and as seller vis-a-vis the buyer. A CCP hedges the risk that its business partners are unable to render the agreed services via a range of protection mechanisms that enable it to counteract losses from the incoming transactions at any time (e.g. through collateralisation). However, despite these protective mechanisms a CCP overleverage and default cannot be ruled out, which could affect the Company's claims for the Fund. This can result in risks to the Fund.

Counterparty risks in transactions under repurchase agreements

If the Company sells securities under repurchase agreements on behalf of the Fund, it must be provided with sufficient collateral against the contracting party's default. In the event of a default of the contract partner during the term of the repurchase transaction, the Company has a right of sale regarding the collateral furnished. There is consequently a risk of loss for the Fund if the collateral furnished no longer adequately covers the full amount of the Company's redemption claim because of rising prices of the securities sold under the repurchase agreement.

Counterparty risks in security lending transactions

If the Company grants a loan over securities on the Fund's account, it needs to be given adequate collateral against the risk of default of the contract partner. The scope of the collateral must be at least the market value of the securities transferred as loaned securities. The borrower must furnish further collateral if the value of the securities provided as a loan increases, the quality of the collateral furnished decreases or its economic situation deteriorates and the collateral already fur-

nished is insufficient. If the borrower fails to comply with this obligation to make additional contributions, there is a risk that the redemption claim is not fully collateralised if the contract partner defaults. If the collateral is held by an institution other than the Fund's custodian institution, there is a further risk that it may not be possible to sell it immediately or in full on default of the lender.

Operational and other risks of the Fund

Operational risk is the risk of loss to an investment fund that results from inadequate internal processes and human or system error at the management company or external events and includes legal, documentation and reputation risks as well as risks that result from the trading, settlement and valuation processes operated for an investment fund.

Below the risks that may arise for instance as a consequence of inadequate internal processes as well as human or system error at the Company or external third parties are presented. These risks may affect the performance of the Fund and thus also have a negative impact on the unit value and the capital invested by the investor.

Risks from criminal acts, wrongdoing or natural disasters

The Fund may become the subject of fraud or other criminal acts. It may also sustain losses as a result of errors on the part of employees of the Company or external third parties or an external events such as natural disasters or pandemics.

Country and transfer risk

There is a risk that a foreign debtor is solvent but, due to the fact that the country in which it is headquartered is unable or unwilling to effect transfers, or for other reasons it is not able to render performance on time or at all, or only in another currency. For example, payments to which the Company has a claim on the Fund's account may not be made, or may be paid in a currency that is not convertible (any longer) due to currency restrictions, or made in another currency. If the debtor pays in a different currency, this position is subject to the currency risk described above.

Legal and political risks

Investments may be made for the Fund in legal systems where German law does not apply or, in the case of legal disputes,

the place of jurisdiction is outside Germany. Any resulting rights and duties of the Company on the Fund's account may deviate from those in Germany to the detriment of the Fund or the investor. Political or legal developments, including the modification of framework legal conditions in these legal systems, may not be identified by the Company in time or at all or may result in restrictions regarding assets that may be or already have been acquired. These consequences may also arise if the legal framework conditions for the Company and/or the management of the Fund in Germany change.

Change of fiscal outline conditions, fiscal risk

The statement on tax provisions in this sales prospectus is based on the currently known legal situation. The brief information on tax provisions is addressed to individuals who are subject to unlimited income tax liability or unlimited corporation tax liability in Germany. However, it cannot be guaranteed that the fiscal valuation remains unchanged by legislation, court decisions or decrees by the tax authorities.

Key staff risk

If the Fund performs particularly well over a specific period, it probably owes it success also to the aptitude of the responsible individual and thus the correct decisions by the management. However, the personnel managing the Fund may change. New decision-makers may act less successfully.

Custodial risk

There is a risk associated with the custody of assets, particularly overseas, that may arise from insolvency, breaches of duty of care by the custodian or force majeure.

Risks from trading and clearing mechanisms (settlement risk)

Where securities transactions are settled, there is a risk that a contract partner pays late or not in line with the contract or does not deliver the securities by the respective deadline. Accordingly, this settlement risk also exists in the trading of other assets for the Fund.

Explanation of the risk profile of the Fund

The risk profile of the Fund is represented by the Company using a seven-stage scale on which funds of risk class 1 have a

low risk and funds of risk class 7 have a high risk. A low risk does not mean that a fund can be categorised as "risk-free".

The model for calculating the risk class is largely based on the past performance of the Fund, taking into account the intensity and extent of the fluctuations of the unit value in this period. Classification to a risk class cannot therefore provide any conclusions about future value increases or price falls of the Fund. An explanation of the risks in connection with the Fund can be found in the section "Risk factors".

The classification of a fund to a specific risk class is not guaranteed and may change over time. The respective applicable risk category can be found in the latest version of the key investor information, which can be obtained via the channels described in "Sales documents and disclosure of information".

Increased volatility

The Fund may exhibit increased volatility as a result of its composition, that is, the unit prices may fluctuate drastically within short periods.

Profile of the typical investor

The Fund is aimed at all types of investors who pursue the goal of asset formation or asset optimisation. Investors should be able to bear significant fluctuations in value and significant losses, and need no guarantee that they will receive their amount invested. Investment in the **LOYS Global MH** is only suited to experienced investors. The investment horizon should be at least five years.

Units

The rights of investors are securitised in unit certificates or issued as electronic unit certificates. Securitised unit certificates are only securitised in global certificates. These global certificates are kept with a central securities depository. The investor is not entitled to the delivery of individual unit certificates. The acquisition of units is only possible if they are held in custody.

Issue and redemption of units

Issue of units

There is no limit on the number of units that may be issued. The units may be purchased from the Company. They are issued by the custodian at the subscription price that is made up of the net asset value (unit value) plus a front-end fee. The calculation of the net asset value is explained in sub-section "Subscription and redemption price" of the "Costs" section. In addition, units can be purchased through the agency of third parties which may result in additional costs. The Company reserves the right to discontinue the issue of units either temporarily or permanently.

Holders of bearer certificates of unit class A (t) and B (t) are entitled of non-recurrent investment or may enter into a savings plan through the distributors. The minimum investment sum is EUR2,500,000.00 for unit class C (t).

Redemption of units

Irrespective of a minimum investment amount, investors can request the redemption of their units on each valuation day, provided the Company has not restricted the redemption of units (see "Restriction on redemption" section) or temporarily suspended it (see "Suspension of redemption" section). Redemption orders must be submitted to the custodian, the Company itself or to an intermediary third party (e.g. investor account service).

The Company is obliged to redeem the units at the redemption price applicable on the settlement date, which corresponds to the unit value determined on that day – minus a redemption fee, if applicable. The units can also be redeemed through the mediation of a third party, this may result in additional costs.

Restriction on redemption

The Company may restrict the redemption of units for a total of up to 15 consecutive working days if the redemption requests from investors on a settlement date reach at least 5% of the net asset value (threshold). If the threshold is reached or

exceeded, the Company decides freely after a due assessment of the circumstances whether to restrict redemption on this settlement date. If it decides to restrict redemption, it may continue this on the basis of a daily discretionary decision for up to 14 consecutive working days. The Company may decide to restrict redemption if the redemption requests can no longer be carried out in the interest of all investors due to the liquidity situation of the Fund. This can be the case, for example, if the liquidity of the Fund's assets deteriorates due to political, economic or other events on the markets and is therefore no longer sufficient to fully satisfy the redemption requests on the settlement date. In this case, the restriction on redemption is to be regarded as a milder means than the suspension of redemption.

If the Company has decided to restrict redemption, it will only redeem units proportionally at the redemption price applicable on the settlement date; otherwise the redemption obligation does not apply. This means that every redemption request will only be carried out proportionally on the basis of a quota determined by the Company. The Company determines the quota in the interest of the investors on the basis of available liquidity and the total order volume for the respective settlement date. The amount of available liquidity depends largely on the current market environment. The quota determines the percentage of the redemption requests that are paid out on the settlement date. The unexecuted part of the order (remaining order) will not be executed by the Company at a later point in time, but will expire (pro-rata approach with expiring remaining order).

The Company decides on each trading day whether and on the basis of which quota to restrict redemption. The Company may restrict redemption for a maximum of 15 consecutive working days. The possibility to suspend the redemption remains unaffected.

The Company shall publish information on the restriction on the redemption of units and its lifting on its website without delay.

The redemption price corresponds to the unit value determined on that day – minus a redemption fee, if applicable. The units can also be redeemed through the mediation of a third party (e.g. investor account service), this may result in additional costs for investors.

Pricing for subscription and redemption of units

The Company takes account of the principle of equal treatment of all investors by ensuring that no investor gains an advantage by buying or selling units at previously known unit values. It specifies a daily order acceptance deadline. Issue and redemption orders received by the custodian or the Company until the order acceptance deadline are settled by no later than on the valuation day (= settlement day) that follows the receipt of the order at the unit value then determined. Orders received by the custodian or the Company after the order acceptance deadline are settled on the second valuation day (= settlement day) at the unit value then determined. The order acceptance deadline for this Fund is published on the Company's homepage at www.ampega.com. It may be changed by the Company at any time.

Moreover, third parties, such as the investor's custodian institution, may bring about the issue or redemption of units, which may result in long settlement periods. The Company has no influence on the various settlement methods of the custodian institutions.

The Company does not permit any practices relating to market timing and reserves the right to reject any subscription, redemption or conversion requests from an investor where it considers that such practices may be being pursued. The Company will further implement any necessary measures to protect the Fund's investors.

Suspension of unit redemption

The Company may temporarily suspend the redemption of units in the event of extraordinary circumstances that render such suspension necessary, taking into account the investors' interests. Extraordinary circumstances may be for example the unscheduled closure of a stock exchange on which a substantial proportion of the Fund's securities are traded, or if the Fund's assets cannot be valued. In addition, the Federal Financial Supervisory Authority may order that the Company suspend redemption of the units if this is required in the interest of the investors or in the public interest.

The Company reserves the right not to redeem or exchange the units at the applicable redemption price if it has just sold

assets of the respective fund, albeit in consideration of the interests of all investors. Without further resumption of redemption of units, a suspension may immediately be followed by a liquidation of the Fund (please refer to the "Liquidation, transfer and merger of the Fund" section).

The Company shall notify the investors of the suspension and resumption of redemption of the units in the Federal Gazette and also on the Company's homepage (www.ampega.com). The investors will also be informed by durable medium, e.g. in hardcopy or electronically, via their custodian.

Liquidity management

The Company has set down written principles and procedures for the Fund that enable it to monitor the Fund's liquidity risk and manage the liquidity profile of the Fund's investments in line with the underlying liabilities of the Fund. The liquidity profile of the Fund is derived taking into account the investment strategy set out in section "Investment objectives, investment strategy, principles of investment and investment limits". The principles and procedures include:

- The Company monitors the liquidity risks that may arise at fund or asset level. It assesses the liquidity of the assets held in the Fund in relation to the Fund assets and specifies a liquidity quota for this. The liquidity assessment includes for example assumptions about the trading volume, bid-ask spreads, the complexity of the assets and the number of trading days usually required to sell the respective asset without affecting the market price. Here, too, the Company monitors investments in target funds and their redemption rates and any resulting effects on the liquidity of the Fund.
- The Company monitors the liquidity risks that can result from increased redemption demands. It forms expectations about net fund changes taking into account available information about the investor structure and empirical values of historical net fund changes. It takes into account the effects of large-scale call risks and other risks (e.g. reputation risks).
- The Company has specified adequate limits for the liquidity risks. It monitors compliance with these limits and has specified procedures in the event that the limit is or may be exceeded.

- The procedures set out by the Company provide for consistency between liquidity quota, liquidity risk limits and the anticipated net fund changes.

The Company regularly examines these principles and updates them accordingly.

The Company performs regular stress tests at least on annual basis that it can use to evaluate the liquidity risks of the Fund. The Company performs the stress tests on the basis of reliable and current quantitative or, if this is not adequate, qualitative information. This takes in investment strategies, redemption periods, payment obligations and periods within which the assets can be sold as well as information relating to general investor behaviour and market developments. The stress tests simulate any lack of liquidity of the assets in the Fund as well as the number and scope of atypical demands for unit redemptions. They cover market risks and their effects, including margin calls, calls for collateralisation or credit lines. They take account of valuation sensitivities under stress conditions. They are performed at a frequency appropriate to the type of Fund taking into account the investment strategy, the liquidity profile, the investor type and the redemption principles of the Fund.

The surrender rights under normal and exceptional circumstances and the restriction or suspension of redemption are set out in the “Units – Issue and redemption of units – Restriction of unit redemption or suspension of unit redemption” section. The associated risks are explained in the “Risk information – Risk of fund investment – suspension of unit redemption” - and “Risk of limited liquidity of the Fund (liquidity risk)” sections. Stock exchanges and markets

The Company may admit the units of the Fund for trading on a stock exchange or in organised markets or other markets; to date the Company has not made use of this option. However, it cannot be ruled out that units of the Fund as described here are traded on markets without approval by the Company. Third parties can arrange for an inclusion of the units in the outside market or another over-the-counter trading.

The market price underlying trading on stock exchanges or other markets is not solely determined by the value of the assets held in the Fund, but also by supply and demand. For this

reason, the market price may deviate from the unit price calculated by the Company or the custodian respectively.

Costs

Subscription and redemption price

The Company, under the supervision of the custodian, calculates the subscription price and redemption price for the units by determining the value of the assets belonging to the Fund on each valuation day less its liabilities (net asset value). The division of the net asset value so determined by the number of issued unit certificates yields the unit value.

The value of the Fund units is calculated on all German trading days. The company and the custodian need not determine the value on public holidays in Germany that are trading days as well as on 24 and 31 December of each year.

Unit prices are not currently determined on New Year's Day, Good Friday, Easter Day, Easter Monday, First of May, Ascension Day, Whitsun, Whit Monday, Corpus Christi, Day of German Unity, All Saints' Day, Christmas Eve, Christmas Day, Boxing Day and New Year's Eve.

Suspending the calculation of the subscription/redemption price

The Company may temporarily suspend the calculation of the subscription and redemption price under the same conditions as apply to the suspension of unit redemption. These are described in more detail in the section “Suspension of unit redemption”.

Front-end fee

In setting the subscription price a front-end fee is added to the unit value. The front-end fee may be up to 5.00% of the unit value, irrespective of the unit class. The Company is entitled to charge a lower front-end fee for one or more unit classes or to waive the front-end fee altogether. The front-end fee can reduce, or even wipe-out, the performance in particular in the case of short-term investments. The front-end fee essen-

tially represents remuneration for distributing the units of the Fund. The Company may pass on the front-end fee to any distributors as remuneration for distribution services. The front-end fee is currently levied in full for unit class B (t). No front-end fee is levied for unit class A (t) and C (t).

Redemption fee

No redemption fee is charged.

If the Company sets up one or more further unit classes, the level of the respective front-end fee or redemption fee will be listed separately. The Company's homepage (www.ampega.com) contains further information about the set-up of unit classes.

Publication of subscription and redemption prices

The subscription and redemption prices are regularly published on the Internet on the Company's homepage (www.ampega.com).

Costs on subscription and redemption of the units

The Company or the custodian issues or redeems the units at the subscription price (unit value / unit value plus front-end fee) or redemption price (unit value / unit value less redemption fee) with no additional costs being charged.

Where units are distributed via third parties, higher costs than the front-end fee may be charged. If investors return units via third parties, the latter may charge own costs upon the redemption of the units.

Management and other costs

Fees payable to the Company

- a. The Company shall receive a fee for managing the Fund of up to 1.65% per annum of the value of the Fund based on the net asset value determined on each trading day. The Company is free to deduct a lower management fee or no management fee at all for the Fund or one or several unit

classes. Currently a management fee of 0.90% per annum is deducted for unit class A (t). For unit class B (t) a management fee of 1.60% per annum is deducted. For unit class C (t) a management fee of 0.37% is deducted.

Actual management fees of the last three financial years:

Unit class A (t)

1 October 2020 to 30 September 2021: 0.90% p.a.

1 October 2019 to 30 September 2020: 0.90% p.a.

1 October 2018 to 30 September 2019: 0.90% p.a.

Unit class B (t)

1 October 2020 to 30 September 2021: 1.60% p.a.

1 October 2019 to 30 September 2020: 1.60% p.a.

1 October 2018 to 30 September 2019: 1.60% p.a.

- b. The Company shall receive standard market compensation for the initiation, preparation and execution of securities lending transactions and securities repurchase agreements for the account of the Fund up to the maximum of one third of the gross income from these transactions. The costs incurred in connection with the preparation and execution of such transactions and performance of such agreements, including the fees payable to third parties, shall be borne by the Company.

Custodian fee

For its activity the custodian shall receive a fee of out of the Fund of 0.05% per annum of the value of the Fund based on the net asset value determined on each trading day. The custodial fee is deducted monthly from the Fund. The Company is free to deduct a lower custodial fee for the Fund or one or several unit classes. Currently the custodian fee for all unit classes is deducted in full.

Fees payable to third parties

- a. Up to 0.05 % per annum of the value of the UCITS fund on the basis of the net asset value determined on each trading day for costs of legally required representatives and tax representatives. The fee is not covered by the management fee and thus additionally charged to the fund's account.
- b. Up to 0.10 % per annum of the value of the UCITS fund on the basis of the net asset value determined on each trading day for third-party costs and compensation for services rendered that are used by the Company for concluding and managing derivatives transactions and managing the collateral underlying such derivatives transactions (collateral management). In particular, this also includes services rendered by third parties in the context of performing Regula-

tion (EU) No. 648/2012 European Market Infrastructure Regulation (EMIR), inter alia, by means of reports to trade repositories as well as services rendered in connection with entity identifiers and the central clearing of OTC derivatives. The fee is not covered by the management fee and thus additionally charged to the fund's account.

Permissible annual maximum amount

The amount that is deducted annually from the UCITS fund as a fee may total up to 1.93% per annum of the value of the UCITS fund calculated on the basis of the net asset value determined on each trading day.

Expenses

Alongside the fees described in the preceding paragraphs, the following expenses may also be charged to the Fund:

- a. standard bank custody account fees and account fees, where applicable including standard costs of holding foreign possessions overseas;
- b. costs for the print and dispatch of the sales documents required by law (annual and semi-annual reports, sales prospectus, key investor information) intended for the investors;
- c. costs of publication of the annual and semi-annual reports, the subscription and redemption prices and the distributions or accumulations and the liquidation report as required;
- d. costs for the creation and use of a durable medium, except in case of providing information on the merger of funds and on measures taken in connection with violations of the investment limits or calculation errors occurring upon the determination of unit values;
- e. costs of auditing the Fund by the Fund's auditor;
- f. costs of publishing the tax bases and declaration that the tax-related information has been ascertained in accordance with German tax law;
- g. costs of establishing and enforcing legal claims of the Fund by the Company for account of the Fund as well as defence of claims made against the Company at the expense of the Fund;
- h. fees and costs levied by official bodies in relation to the Fund;
- i. costs for legal and tax advice in respect of the Fund;
- j. costs as well as any payments that might accrue upon the purchase and/or use and/or specification of a comparison benchmark or financial index;

k. costs of instructing proxies;

- l. costs of the analysis of the investment performance of the Fund by third parties;
- m. Costs of providing third-party material or services for analysis in relation to one or more financial instruments or other assets or in relation to the Issuers or potential Issuers of financial instruments or closely related to a particular industry or market of up to 0.08% p.a. of the Fund's annual average net asset value, which is calculated on each trading day;
- n. taxes payable in connection with the fees payable to the Company, the custodian and third parties and the taxes accruing in connection with the costs described above including the taxes arising in connection with the management and custody.

In addition to the aforementioned fees and expenses, the costs arising in connection with the acquisition and sale of assets are charged to the Fund (so-called transaction costs). The amount of transaction costs to be borne by the Fund depends on the number of transactions actually carried out during the financial year. This can vary greatly due to different market conditions or assessments. The transaction costs per transaction are individually agreed with the custodian. The Fund is charged the actual costs incurred.

Performance fee

The Company may receive a performance fee for managing the fund of up to 10.00% per issued unit of the amount by which the unit value at the end of a settlement period exceeds the maximum unit value at the end of the five preceding settlement periods ("high water mark"), but no more than 15.00% of the average net asset value of the fund in the settlement period calculated on the values determined on each trading day. If there exist less than five preceding settlement periods for the fund, all preceding settlement periods shall be taken into account in the calculation of the claim to remuneration. In the first settlement period after the launch of the fund, the high water mark is superseded by the unit value at the beginning of the first settlement period.

The Company is entitled to charge a lower performance fee for one or more unit classes or to waive the performance fee altogether.

The settlement period begins on 1 October and ends on 30 September of a calendar year. The first settlement period begins on 30 June 2013 and ends on 30 September 2014.

The performance fee is determined in the settlement period on the basis of the unit performance calculated according to the BVI method.

The performance calculation according to the BVI method is based on the internationally accepted “time weighted rate of return” standard method. The calculation method measures the percentage change of the invested assets at the beginning and end of a period under review whereby distributions are notionally invested in new units and thus treated like accumulations. The performance is calculated on the basis of the unit values determined on each trading day. The unit value results from the determined net asset value divided by the number of issued units. The assets and earnings are added to the result and the costs of the UCITS fund as well as any loans taken up and other liabilities are deducted.

In line with the result of a daily calculation, a calculated performance fee is set aside in the fund per unit issued or a provision that has already been posted is reversed correspondingly. Reversed provisions accrue to the fund. A performance fee may only be deducted if corresponding provisions have been made. Currently the performance fee for unit class A (t) and B (t) is deducted in full. Currently the performance fee for unit class C (t) is not deducted.

Special features of the acquisition of investment fund units

A management fee for the units held in target funds contained in the Fund is also charged alongside the management fee for the fund described here. If the Fund invests a significant portion of its assets in investment fund units, the operating costs for the target fund units held in the Fund are taken into account in the calculation of the total cost ratio (see section “Costs - total cost ratio”).

In connection with the purchase of target fund units, the following types of fees, costs, taxes, commissions and other expenses incurred are also to be borne by the investors either indirectly or directly.

The annual and semi-annual reports set out the front-end fees and redemption fees that are charged to the Fund in the

period under review for the acquisition and redemption of units in other target funds. Additionally the fee that the Fund is charged by a German or foreign company or a company in which the investment company has a material direct or indirect stake as a management fee for the target fund units contained in the Fund is set out.

Statement of a total cost ratio

The annual report sets out the management costs incurred by the Fund and shown as the ratio of the average fund value (“total cost ratio”). This is made up of the fee for the management of the Fund, including the performance fee, the custodian fee and the additional costs payable out of the Fund (see section “Costs - management and other costs” as well as “Special features of the acquisition of investment fund units”). If the Fund invests a significant portion of its assets in other open-end funds, the total cost ratio of the target funds is additionally taken into account. Excluded are the ancillary costs and costs incurred in the acquisition and disposal of assets (transaction costs). The total cost ratio is published in the key investor information as so-called “operating costs”.

Different statement of costs by distributors

If the investor is advised on the acquisition of units by third parties or the latter bring about the purchase, they possibly state costs or cost ratios that do not match the cost details in this prospectus and in the key investor information and may exceed the total cost ratio described here. In particular, this may be particular due to the fact that the third party additionally takes the costs of his own activity (e.g. agency, advice or keeping custody account/s) into account. In addition, he may also charge one-off costs such as front-end fees and usually uses other calculation methods or estimates of fund-level costs, which include the transaction costs of the Fund in particular.

Deviations in the cost statement can occur both with information provided before the conclusion of contract as well as in providing regular cost information about the existing fund investment in the context of a lasting customer relationship.

Remuneration policy

The Company has established a remuneration policy pursuant to section 37 KAGB which forms the binding framework for the remuneration policies and practices that are compatible with and conducive to sound and effective risk management. It encourages neither the assumption of risks that are inconsistent with the risk profiles or the terms and conditions of investment of the funds managed by it, nor does it prevent the Company from acting dutifully in the best interest of the Fund.

In line with statutory provisions, the remuneration policy particularly contains detailed requirements with regard to the general remuneration policies and voluntary retirement benefits and provisions for fixed and variable salaries and information about the employees involved in this remuneration policy. It also provides information on the allocation and disbursement modalities of the variable remuneration.

The remuneration policy is based on the size of the management company and the funds managed by it, the internal organisation and the nature, scope and complexity of the business done by the Company. The remuneration policy is consistent with the business strategy, objectives, values and interests of the Company and the funds managed by it as well as the investors of such funds. It also includes measures to avoid conflicts of interest.

Information on the Company's current remuneration policy is published online at <https://www.ampega.com/leistungen/publikumsfonds/hinweise/> (in German). It includes a description of the methods for calculating remuneration and benefits to certain groups of employees and details of the persons responsible for the allocation. The Company provides the information free-of-charge in hardcopy upon request.

Fair treatment of investors and unit classes

All issued units have the same features. Currently the Company has created unit classes A (t), B (t) and C (t) for the Fund. Units with different features may be created and such units issued at the Company's discretion. In these cases units with the same features respectively form a unit class. The Compa-

ny's homepage (www.ampega.com) contains further information for investors about the creation of different unit classes.

The Company must treat the investors of the Fund fairly. In controlling the liquidity risk and redeeming the units, it must not put the interests of an investor or a group of investors above the interests of another investor or another group of investors.

For procedures by means of which the Company ensures the fair treatment of investors, see sections "Settlement on the issue and redemption of units" as well as "Liquidity management".

Calculation of income, income equalisation procedure

The Fund realises income from the interest, dividends and income from investment units that have accrued during a financial year and not been used to cover the costs. Income from loan and repurchase transactions is added. Further income may result from a sale of assets held for account of the Fund.

The Company operates income equalisation for the Fund. This prevents a variation of the portion of distributable income in the unit price as a result of cash inflows and outflows. Otherwise any cash inflow in the Fund during the financial year would result in the fact that less income is available for distribution per unit on the distribution dates as would be the case at a constant number of units in circulation. On the other hand, outflows would result in the fact that more income would be available for distribution per unit as would be the case at a constant number of units in circulation.

To prevent this, the distributable income to be paid by the unit buyer as part of the issue price and obtained by the seller of units as part of the redemption price is continuously calculated and reported as a distributable item in the income statement during the financial year. The fact that investors who, for instance, acquire units shortly before the distribution date are given back the part of the subscription price attributable to income in the form of a distribution, although the capital they paid in has not contributed to the generation of income is taken into account.

In the case of accumulating funds, income equalisation means that the income per unit shown in the annual report is not affected by the number of units in circulation.

Performance, calculation and appropriation of income, financial year

Performance

Unit class A (t)

Performance calculated using the BVI method (German Investment and Asset Management Association) (cumulative), that is, without taking the front-end fee into account.

The Loys Global MH A (t) was launched in 2006.

The historical performance was calculated in EUR.

The historical performance of the Fund is no guarantee for its future performance.

Unit class B (t)

Performance calculated using the BVI method (German Investment and Asset Management Association) (cumulative), that is, without taking the front-end fee into account.

The Loys Global MH B (t) was launched in 2006.

The historical performance was calculated in EUR.

Unit class C (t)

Performance calculated using the BVI method (German Investment and Asset Management Association) (cumulative), that is, without taking the front-end fee into account.

The Loys Global MH C (t) was launched in 2020.

The historical performance was calculated in EUR.

The historical performance of the Fund is no guarantee for its future performance.

The performance of the Fund is published on the Company's homepage (www.ampega.com), including an appropriate graphic form.

The historical performance of the Fund is no guarantee for its future performance.

Appropriation of income and financial year

The financial year of the **LOYS Global MH** begins on 1 October and ends on 30 September of the subsequent year.

Income is not distributed in the **LOYS Global MH**, but instead reinvested in the Fund (accumulation).

If a distributing unit class were to be set up, the unit holders shall be notified hereof on the Company's homepage (www.ampega.com).

Liquidation, transfer and merger of the Fund

Prerequisites of a liquidation of the Fund

The investors are not entitled to demand liquidation of the Fund. However, the Company may terminate its right to manage the Fund subject to a notice period of at least six months via a notice in the electronic Federal Gazette and additionally in the annual report or semi-annual report. Investors will also be informed by their custodians about the termination by durable medium, such as in paper or electronic form. The right of the Company to manage the Fund shall lapse on the date on which the termination becomes effective.

Further, the right of the Company to manage the Fund shall lapse if insolvency proceedings are initiated against the Fund's assets or when the court judgment via which the initiation of the insolvency proceedings is rejected for lack of assets takes effect.

Upon the lapse of the Company's right to manage the Fund, the right of disposition shall pass to the custodian that liquidates the Fund and distributes the proceeds to the investors, or transfers the management to a different investment company with the approval of the Federal Financial Supervisory Authority.

Procedure on liquidation of the Fund

Once the right to manage the Fund has been transferred to the custodian, the issue and redemption of units is discontinued and the Fund is liquidated.

The income from the disposal of the assets of the Fund less the costs still payable by the Fund and the costs incurred due to the liquidation shall be distributed to the investors, whereby these are entitled to payment of the liquidation funds proportionate to their respective units in the Fund.

The Company shall produce a liquidation report that complies with the requirements of an annual report for the date on which its right to manage the Fund lapses. The liquidation report shall be published in the electronic Federal Gazette no later than three months after the liquidation date. For such time as it liquidates the Fund, the custodian bank shall produce a report annually as well as for the day on which its liquidation of the fund comes to an end that complies with the requirements of an annual report. These reports shall also be published in the electronic Federal Gazette no later than three months after the key date.

Transfer of the Fund

The Company may transfer the right to manage and dispose of the Fund to another management company. The transfer requires the prior approval of BaFin. The approved transfer is announced in the Federal Gazette and also in the annual or semi-annual report of the Fund and the electronic information media specified in this sales prospectus. The date on which the transfer takes effect shall be governed by the contractual agreements between the Company and the receiving management company. The transfer may take effect no earlier than three months after its publication in the Federal Gazette. All rights and duties of the Company in respect of the Fund then pass to the receiving management company.

Prerequisites of a merger of the Fund

All assets of this Fund may be transferred with the consent of the Federal Financial Supervisory Authority to another existing fund or a new fund established through the merger that

has to satisfy the requirements of a UCITS established in Germany or another EU or EEA Member State.

The transfer takes effect at the end of the financial year of the transferring fund (transfer date) unless no other transfer date is specified.

Rights of investors arising upon the merger of the Fund

The investors shall either have the option to redeem their units with no further costs, except for the costs arising for a covering of the liquidation of the Fund or to exchange their units for units of a different open-end fund that is also managed by the Company or a company of the same group and has a similar investment policy as the Fund up to five working days before the planned transfer date.

The Company has to inform the investors of the Fund about the reasons for the merger, the potential impact on investors, their rights in connection with the merger as well as relevant procedural aspects before the planned transfer date by durable medium, such as paper or electronic form. Investors also have to be submitted the key investor information for the fund to which the assets of the Fund are transferred. Investors must receive the aforementioned information at least 30 days before the deadline for the return or exchange of their units.

The net asset values of the fund effecting the takeover or transfer shall be calculated, the exchange ratio determined and the entire transaction audited on the transfer date. The exchange ratio is calculated based on the proportion of the net asset values of the transferred and acquiring fund at the point of the transfer. The investor shall receive the number of units in the new fund that corresponds to his units in the fund being transferred.

If the Investors do not make use of their right to redeem or exchange the units, they become investors of the fund effecting the takeover on the transfer date. Where appropriate, the Company may also determine with the managing company of the fund effecting the takeover that investors in the fund being transferred have up to 10% of the value of their units paid out in cash. The Fund is liquidated upon the transfer of all assets. If the transfer takes place during the financial year of the

fund to be transferred, the Company must produce a report for the transfer date that complies with the requirements of an annual report.

The Company shall make an announcement in the Federal Gazette as well as in the electronic information media specified in this sales prospectus once the fund has been merged on another investment fund managed by the Company and the merger has taken effect. If the fund is merged on another investment fund that is not managed by the Company, the company managing the acquiring or newly-established fund shall handle the announcement.

Brief information on tax regulations

Statements on tax regulations only apply to investors with unlimited tax liability in Germany. Investors with unlimited tax liability are hereinafter also referred to as resident taxpayers. We recommend that foreign investors contact their tax adviser before acquiring units in the fund described in this prospectus and to clarify any possible tax consequences of acquiring the units individually in their home country. Foreign investors are investors without unlimited tax liability. They are hereinafter also referred to as non-resident taxpayers.

As a special-purpose fund, the Fund is generally exempt from corporation income tax and trade tax. However, it is partially liable to corporation income tax with its German investment income and other German income for the purposes of limited income tax liability, with the exception of gains on the sale of shares in corporations. The tax rate is 15%. Insofar as the taxable income is collected by way of deduction of tax on investment income, the tax rate of 15% already includes the solidarity surcharge.

However, for private investors investment income is subject to income tax as income from investments if this and other income exceed the saver allowance of EUR801 annually (for single taxpayers or spouses who submit separate tax returns) or EUR1,602 for spouses who submit a joint tax return.

Income from investments is basically taxable at a rate of 25% (plus the solidarity surcharge and church tax where applica-

ble). Income from investments also includes the income from investment funds (investment income), i.e. distributions by the Fund, the advance lump-sum amounts and the gains from the sale of the units. Under certain circumstances, investors can receive a lump-sum portion of this investment income tax-free (so-called partial exemption).

The effect of the withholding of tax is final for private investors (final withholding tax), meaning that income from investments does not usually need to be declared in the income tax return. The custodian institutions take into account offsetting losses and foreign withholding taxes arising from the direct investments, at the point that the tax is withheld.

The withholding of tax has no final function for example if the personal tax rate is lower than the withholding rate of 25%. In this case the income from investments can be declared in the income tax return. The tax authority then applies the lower personal tax rate and includes the withheld tax in the personal tax liability (that is, determining what tax method puts the tax payer in the better position, known as *Günstigerprüfung*).

If tax has not been withheld for income from investments (for example because a gain has been generated from the disposal of units in a foreign custody account), this must be declared in the tax return. In the scope of the tax assessment income from investments is also subject to a withholding rate of 25% or the lower personal tax rate.

If the units are held as business assets, the income is treated as business income for tax purposes.

Units held as private assets (resident taxpayers)

Distributions

Distributions of the Fund are generally taxable.

If the Fund meets the tax requirements for an equity fund in terms of partial exemption, 30% of the distributions are tax-exempt. Equity funds are investment funds that continually invest more than 50% of their value or assets in equity investments in accordance with the terms of investment.

If the Fund meets the tax requirements for a mixed fund in terms of partial exemption, 15% of the distributions are tax-exempt. Mixed funds are investment funds that continually invest at least 25% of their value or assets in equity investments in accordance with the terms of investment.

If the Fund does not meet the requirements for an equity fund nor a mixed fund, no partial exemption applies to distributions.

A tax classification for purposes of the partial exemption of the Fund(s) or sub-fund(s) can be found in the annex to this brief information on the tax regulations that are important for German investors. It may change for the future. In such a case, the unit is deemed to have been sold and acquired on the following day with a new tax classification for the purpose of partial exemption; however, a resulting notional capital gain must first be considered as soon as the units are actually sold.

The tax deduction may be waived if the investor is a resident taxpayer and presents an application for exemption provided that the taxable income elements do not exceed EUR801 for individuals with a single liability or EUR1,602 for spouses who submit a joint tax return.

The same applies to the presentation of a certificate for persons who are not expected to be assessed for income tax (hereinafter referred to as exemption certificate (NV-Bescheinigung)).

If an investor domiciled in Germany holds the units in a custody account in Germany, the custodian institution will not withhold tax in its capacity as the paying agent if it is presented with an official application for exemption made in a sufficiently high amount or an exemption certificate issued by the German tax authorities for a duration of three years before the specified distribution date. In such cases, the investor will be credited with the total amount of the distribution with no tax being withheld.

Advance lump-sum amounts

The advance lump-sum amount is the amount by which the distributions of the Fund fall below the base yield for a calendar year within one calendar year. The base yield is calculated by multiplying the redemption price of the unit at the beginning of a calendar year by 70 percent of the base interest rate,

which is derived from the long-term return on government bonds. The base yield is limited to the excess amount that results between the first and the last redemption price determined in the calendar year plus the distributions within the calendar year. In the year of acquisition of the units, the advance lump-sum amount decreases by one twelfth for each full month preceding the month of acquisition. The advance lump-sum amount is deemed to have accrued on the first working day of the following calendar year.

Advance lump-sum amounts are taxable in principle.

If the Fund meets the tax requirements for an equity fund in terms of partial exemption, 30% of the advance lump-sum amounts are tax-exempt. Equity funds are investment funds that continually invest more than 50% of their value or assets in equity investments in accordance with the terms of investment.

If the Fund meets the tax requirements for a mixed fund in terms of partial exemption, 15% of the advance lump-sum amounts are tax-exempt. Mixed funds are investment funds that continually invest at least 25% of their value or assets in equity investments in accordance with the terms of investment.

If the Fund does not meet the requirements for an equity fund nor a mixed fund, no partial exemption applies to advance lump-sum amounts.

A tax classification for purposes of the partial exemption of the Fund(s) or sub-fund(s) can be found in the annex to this brief information on the tax regulations that are important for German investors. It may change for the future. In such a case, the unit is deemed to have been sold and acquired on the following day with a new tax classification for the purpose of partial exemption; however, a resulting notional capital gain must first be considered as soon as the units are actually sold.

The tax deduction may be waived if the investor is a resident taxpayer and presents an application for exemption provided that the taxable income elements do not exceed EUR801 for individuals with a single liability or EUR1,602 for spouses who submit a joint tax return.

The same applies to the presentation of a certificate for persons who are not expected to be assessed for income tax

(hereinafter referred to as exemption certificate (NV-Bescheinigung)).

If an investor resident in Germany holds the units in a custody account in Germany, the custodian institution will not withhold tax in its capacity as the paying agent if it is presented with an official application for exemption made in a sufficiently high amount or an exemption certificate issued by the German tax authorities for a maximum duration of three years before the specified accrual date. In this case, no tax is paid. Otherwise, the investor must provide the German custodian institution with the amount of tax to be paid. For this purpose, the custodian institution may collect, without the consent of the investor, the amount of tax to be paid from an account held by him in his own name. Insofar as the investor does not object before the payment of the advance lump-sum amount, the custodian institution may collect the tax amount to be paid from an account held by the investor in his own name, in the same way as an account overdraft agreed with the investor for this account has not been used. Insofar as the investor does not fulfil his obligation to make the amount of tax to be paid available to the German custodian institution, the custodian institution must notify the relevant tax office. In this case, the investor must state the advance lump-sum amount in his income tax return.

Capital gains at investor level

If units in the Fund are sold, the capital gain is subject to a withholding tax rate of 25%. If the Fund meets the tax requirements for an equity fund in terms of partial exemption, 30% of the capital gains are tax-exempt. Equity funds are investment funds that continually invest more than 50% of their value or assets in equity investments in accordance with the terms of investment.

If the Fund meets the tax requirements for a mixed fund in terms of partial exemption, 15% of the capital gains are tax-exempt. Mixed funds are investment funds that continually invest at least 25% of their value or assets in equity investments in accordance with the terms of investment.

If the Fund does not meet the requirements for an equity fund nor a mixed fund, no partial exemption applies to capital gains.

A tax classification for purposes of the partial exemption of the Fund(s) or sub-fund(s) can be found in the annex to this brief information on the tax regulations that are important for German investors. It may change for the future. In such a case, the unit is deemed to have been sold and acquired on the following day with a new tax classification for the purpose of partial exemption; however, a resulting notional capital gain must first be considered as soon as the units are actually sold.

If the units are held in a custody account in Germany, the custodian withholds tax taking account of any partial exemption. The tax deduction of 25% (plus solidarity surcharge and church tax where applicable) can be avoided by presenting an application for exemption made in a sufficiently high amount or an exemption certificate. If such units are sold at a loss by a private investor, the loss – possibly reduced as a result of a partial exemption – can be offset against other positive income from investments. If the units are held in a German custody account and positive income from investments was generated with the same custodian institution in the same calendar year, the custodian institution offsets the loss.

When determining the capital gain, the gain is to be reduced by the advance lump-sum amounts assessed during the holding period.

Units held as business assets (tax payers resident in Germany)

Tax-exempt unit class

If there is a tax-exempt unit class, the information can be found in the Special Terms and Conditions of Investment and in the sales prospectus.

A unit class is tax-exempt insofar as the units in a unit class may only be acquired or held by tax-privileged investors who are a domestic corporation, association of persons or estate, which, according to the articles of association, the foundation deed or other constitution and according to the actual management serves exclusively and directly charitable or church purposes, or a public law foundation that exclusively and directly serves church purposes; this does not apply if the units are held in an economic business enterprise. The same applies to comparable foreign investors residing and having their management in a foreign country that provide administrative

assistance and mutual assistance in recovery of taxes, customs and certain fees.

A unit class is also tax-exempt provided that its units are held only or in addition to the above-mentioned tax-privileged investors within the framework of old-age provision or retirement annuity insurance agreements which were certified under the German Pension Contracts Certification Act (Altersvorsorgeverträge-Zertifizierungsgesetz).

The prerequisites for the tax exemption of a unit class are that the investors provide the Fund with appropriate evidence of their tax exemption and that the terms and conditions of investment only permit the surrender of units in such a unit class to the investment fund and the transfer of units in such a unit class is excluded.

Furthermore, the exemption from corporation income tax on German dividends and income from German equity-like participation rights incurred at Fund level mainly requires that German equities and German equity-like profit participation rights were held by the Fund as the beneficial owner continuously for 45 days within 45 days before and after the maturity date of the investment income and there was a constant minimum value change risk of 70% during these 45 days.

Tax exemption amounts (section 12 (1) InvStG)¹ that the company receives in connection with the management of the Fund and that are attributable to income from the unit classes described above must be paid out to the investors in these unit classes. This notwithstanding, the company is entitled to transfer the exemption amounts directly to the Fund for the benefit of investors in this unit class; as a result of this addition, no new units will be issued. Refund of corporation income tax accrued to the Fund Corporation income tax accrued at Fund level may be refunded to the Fund for onward transmission to an investor, provided that the investor is a German corporation, association of persons or assets that, in accordance with the Articles of Association, the foundation deed or any other constitution and the actual management, exclusively and directly serves charitable, benevolent or ecclesiastical purposes or a public law foundation that exclusively and directly serves charitable or benevolent purposes, or is a public law entity exclusively and directly serving church purposes; this does not apply if the units are held in an economic business. The same applies to comparable foreign investors with

headquarters and management in a foreign state providing administrative and collection assistance.

This is based on the prerequisite that such an investor has filed a corresponding application and the corporation income tax incurred is attributable to his holding period on a pro-rata basis. In addition, the investor must have been the beneficial owner under civil law for at least three months before the inflow of income of the Fund subject to corporation income tax without being subject to an obligation to transfer the units to another person. Furthermore, in respect of corporation income tax on German dividends and income from German equity-like participation rights incurred at Fund level, the refund mainly requires that German equities and German equity-like profit participation rights were held by the Fund as the beneficial owner continuously for 45 days within 45 days before and after the maturity date of the investment income and there was a constant minimum value change risk of 70% during these 45 days (so-called 45-day rule).

Evidence of tax exemption and an investment units deposit statement issued by the custodian institution must be attached to the application. The investment units deposit statement is a certificate conforming to the official sample document which deals with the units continuously held by the investor during the calendar year as well as the time and extent of acquisition and disposal of units during the calendar year.

Corporation income tax incurred at Fund level can also be reimbursed to the Fund for distribution to an investor to the extent that the units in the Fund are held in the scope of old-age provision or retirement annuity insurance agreements, which were certified under the German Pension Contracts Certification Act (Altersvorsorgeverträge-Zertifizierungsgesetz). This requires that the provider of an old-age provision or retirement annuity insurance agreement notifies the Fund one month after the end of the latter's financial year, at what times and to what extent units were acquired or sold. In addition, the above-mentioned 45-day rule must be taken into account.

There is no obligation on the Fund or the Company to have the corresponding corporation income tax refunded for the purpose of transfer to the investor.

Due to the high complexity of the rule, the involvement of a tax adviser seems sensible.

Distributions

Sums distributed by the Fund are basically liable to income tax and/or corporation income tax and trade tax.

If the Fund meets the tax requirements for an equity fund in terms of partial exemption, 60% of the distributions are tax-exempt for income tax purposes and 30% for trade tax purposes if the units are held by natural persons in the company's assets. For taxable corporations, 80% of the distributions are generally tax-exempt for corporation income tax purposes and 40% for trade tax purposes. For corporations that are life or health insurance companies or pension funds and in which the units are to be allocated to capital investments or which are credit institutions and in which the units are to be allocated to the trading portfolio within the meaning of section 340e (3) HGB or, at the time of addition to the business assets, are to be reported as current assets, 30% of the distributions are tax-exempt for corporation income tax purposes and 15% for trade tax purposes. Equity funds are investment funds that continually invest more than 50% of their value or assets in equity investments in accordance with the terms of investment.

If the Fund fulfils the tax conditions for a mixed fund in terms of partial exemption, 30% of the distributions are tax-exempt for income tax purposes and 15% for trade tax purposes if the units are held by natural persons in the company's assets. For taxable corporations, 40% of the distributions are generally tax-exempt for corporation income tax purposes and 20% for trade tax purposes. For corporations that are life or health insurance companies or pension funds and in which the units are to be allocated to capital investments or which are credit institutions and in which the units are to be allocated to the trading portfolio within the meaning of section 340e (3) HGB or, at the time of addition to the business assets, are to be reported as current assets, 15% of the distributions are tax-exempt for corporation income tax purposes and 7.5% for trade tax purposes. Mixed funds are investment funds that continually invest more than 25% of their value or assets in equity investments in accordance with the terms of investment.

If the Fund does not meet the tax requirements for an equity fund nor a mixed fund, no partial exemption applies to distributions.

A tax classification for purposes of the partial exemption of the Fund(s) or sub-fund(s) can be found in the annex to this brief information on the tax regulations that are important for German investors. It may change for the future. In such a case, the unit is deemed to have been sold and acquired on the following day with a new tax classification for the purpose of partial exemption; however, a resulting notional capital gain must first be considered as soon as the units are actually sold.

As a rule, the distributions are subject to 25% tax deduction (plus solidarity surcharge).

If the tax requirements for an equity fund or a mixed fund are met, the partial exemption rate uniformly applicable to private investors is applied for tax withholding purposes, i.e. in case of an equity fund, it amounts to 30% and to 15% in case of a mixed fund.

Advance lump-sum amounts

The advance lump-sum amount is the amount by which the distributions of the Fund fall below the base yield for a calendar year within one calendar year. The base yield is calculated by multiplying the redemption price of the unit at the beginning of a calendar year by 70 percent of the base interest rate, which is derived from the long-term return on government bonds. The base yield is limited to the excess amount that results between the first and the last redemption price determined in the calendar year plus the distributions within the calendar year. In the year of acquisition of the units, the advance lump-sum amount decreases by one twelfth for each full month preceding the month of acquisition. The advance lump-sum amount is deemed to have accrued on the first working day of the following calendar year.

Advance lump-sum amounts are generally liable to income tax and/or corporation income tax and trade tax.

If the Fund meets the tax requirements for an equity fund in terms of partial exemption, 60% of the advance lump-sum amounts are tax-exempt for income tax purposes and 30% for trade tax purposes if the units are held by natural persons in the company's assets. For taxable corporations, 80% of the ad-

vance lump-sum amounts are generally tax-exempt for corporation income tax purposes and 40% for trade tax purposes. For corporations that are life or health insurance companies or pension funds and in which the units are to be allocated to capital investments or which are credit institutions and in which the units are to be allocated to the trading portfolio within the meaning of section 340e (3) HGB or, at the time of addition to the business assets, are to be reported as current assets, 30% of the advance lump-sum amounts are tax-exempt for corporation income tax purposes and 15% for trade tax purposes. Equity funds are investment funds that continually invest more than 50% of their value or assets in equity investments in accordance with the terms of investment.

If the Fund meets the tax requirements for a mixed fund in terms of partial exemption, 30% of the advance lump-sum amounts are tax-exempt for income tax purposes and 15% for trade tax purposes if the units are held by natural persons in the company's assets. For taxable corporations, 40% of the advance lump-sum amounts are generally tax-exempt for corporation income tax purposes and 20% for trade tax purposes. For corporations that are life or health insurance companies or pension funds and in which the units are to be allocated to capital investments or which are credit institutions and in which the units are to be allocated to the trading portfolio within the meaning of section 340e (3) HGB or, at the time of addition to the business assets, are to be reported as business assets, 15% of the advance lump-sum amounts are tax-exempt for corporation income tax purposes and 7.5% for trade tax purposes. Mixed funds are investment funds which, in accordance with the terms and conditions of investment, continuously invest at least 25% of their value or assets in equity interest. If the Fund does not meet the tax requirements for an equity fund nor a mixed fund, no partial exemption applies to advance lump-sum amounts.

A tax classification for purposes of the partial exemption of the Fund(s) or sub-fund(s) can be found in the annex to this brief information on the tax regulations that are important for German investors. It may change for the future. In such a case, the unit is deemed to have been sold and acquired on the following day with a new tax classification for the purpose of partial exemption; however, a resulting notional capital gain must first be considered as soon as the units are actually sold.

As a rule, the distributions are subject to 25% tax deduction (plus solidarity surcharge).

If the tax requirements for an equity fund or a mixed fund are met, the partial exemption rate uniformly applicable to private investors is applied for tax withholding purposes, i.e. in case of an equity fund, it amounts to 30% and to 15% in case of a mixed fund.

Capital gains at investor level

Gains from the disposal of the units are basically subject to income tax and/or corporation income tax and trade tax. When determining the capital gain, the gain is to be reduced by the advance lump-sum amounts assessed during the holding period.

If the Fund meets the tax requirements for an equity fund in terms of partial exemption, 60% of the capital gains are tax-exempt for income tax purposes and 30% for trade tax purposes if the units are held by natural persons in the company's assets. For taxable corporations, 80% of the capital gains are generally tax-exempt for corporation income tax purposes and 40% for trade tax purposes. For corporations that are life or health insurance companies or pension funds and in which the units are to be allocated to capital investments or which are credit institutions and in which the units are to be allocated to the trading portfolio within the meaning of section 340e (3) HGB or, at the time of addition to the business assets, are to be reported as current assets, 30% of the capital gains are tax-exempt for corporation income tax purposes and 15% for trade tax purposes. Equity funds are investment funds that continually invest more than 50% of their value or assets in equity investments in accordance with the terms of investment.

If the Fund meets the tax requirements for a mixed fund in terms of partial exemption, 30% of the capital gains are tax-exempt for income tax purposes and 15% for trade tax purposes if the units are held by natural persons in the company's assets. For taxable corporations, 40% of the capital gains are generally tax-exempt for corporation income tax purposes and 20% for trade tax purposes. For corporations that are life or health insurance companies or pension funds and in which the units are to be allocated to capital investments or which are credit institutions and in which the units are to be allocated to the trading portfolio within the mean-

ing of section 340e (3) HGB or, at the time of addition to the business assets, are to be reported as current assets, 15% of the capital gains are tax-exempt for corporation income tax purposes and 7.5% for trade tax purposes. Mixed funds are investment funds which, in accordance with the terms and conditions of investment, continuously invest at least 25% of their value or assets in equity interest.

In the case of a capital loss, the loss in the amount of the partial exemption to be applied is not deductible at investor level.

If the Fund does not meet the requirements for an equity fund nor a mixed fund, no partial exemption applies to capital gains.

A tax classification for purposes of the partial exemption of the Fund(s) or sub-fund(s) can be found in the annex to this brief information on the tax regulations that are important for German investors. It may change for the future. In such a case, the unit is deemed to have been sold and acquired on the following day with a new tax classification for the purpose of partial exemption; however, a resulting notional capital gain must first be considered as soon as the units are actually sold.

Gains from the sale of units are generally not subject to deduction of tax on investment income.

Negative tax income

It is not possible to allocate negative tax income from the Fund to the investor.

Administration-related taxation

During the liquidation of the Fund, distributions of a calendar year are considered tax-free capital repayments insofar as the last redemption price set in this calendar year falls below the amortised cost.

Summarised overview of taxation for usual business investor groups

	Distributions	Advance lump-sum amounts	Capital gains
Domestic investors:			
Sole traders	<u>Tax on investment income:</u> 25% (the partial exemption for equity funds of 30% or for mixed funds of 15% is taken into account) <u>Substantial taxation:</u> Income tax and trade tax, if applicable, taking into account partial exemptions (equity funds 60% for income tax / 30% for trade tax; mixed funds 30% for income tax / 15% for trade tax)		<u>Tax on investment income:</u> Tax exemption
Entities subject to the standard VAT regime (typically industrial companies; banks, provided shares are not held in the trading portfolio; property insurers)	<u>Tax on investment income:</u> Tax exemption for banks, otherwise 25% (partial exemption for equity funds of 30% or for mixed funds of 15% is taken into account) <u>Substantial taxation:</u> Corporation income tax and trade tax, if applicable, taking into account partial exemptions (equity funds 80% for income tax / 40% for trade tax; mixed funds 40% for income tax / 20% for trade tax)		<u>Tax on investment income:</u> Tax exemption
Life and health insurance companies and pension funds where the fund units are attributable to investments	<u>Tax on investment income:</u> Tax exemption <u>Substantial taxation:</u> Corporation income tax and trade tax, insofar as no provision for premium refunds is made in the commercial balance sheet which is also to be recognised for tax purposes, possibly taking into account partial exemptions (equity funds 30% for corporation income tax / 15% on trade tax; mixed funds 15% for corporate income tax / 7.5% for trade tax)		
Banks holding the fund units in the trading portfolio	<u>Tax on investment income:</u> Tax exemption <u>Substantial taxation:</u> Corporation income tax and trade tax, if applicable, taking into account partial exemptions (equity funds 30% for corporation income tax / 15% for trade tax; mixed funds 15% for corporation income tax / 7.5% for trade tax)		
Tax-exempt charitable or church investors (esp. churches, non-profit foundations)	<u>Tax on investment income:</u> Tax exemption <u>Substantial taxation:</u> Tax-free – in addition, corporation income tax incurred at fund level can be reimbursed on application under certain conditions		
Other tax-exempt investors (in particular pension funds, burial funds and provident funds, provided that the requirements set out in the Corporation Income Tax Act are satisfied)	<u>Tax on investment income:</u> Tax exemption <u>Substantial taxation:</u> Tax-free		

Domestic custody in Germany is assumed. A solidarity surcharge is levied as supplementary tax on tax on investment income, income tax, and corporation income tax. Exemption from the deduction of tax on investment income may require timely sub-mission of certificates to the custodian institution.

Solidarity surcharge

A solidarity surcharge of 5.5% is levied on tax withheld on distributions, advance lump-sum amounts and gains from the disposal of units.

Non-resident taxpayers

If a non-resident taxpayer holds funds units in a custody account held by a German custodian institution, no tax is withheld in respect of distributions, advance lump-sum amounts and gains from the disposal of the units, provided non-resident status can be proven. If the custodian institution is not aware of the non-resident status or if it is not notified hereof in time, the foreign investor must apply for a refund of the withheld tax pursuant to the German Abgabenordnung (Fiscal Code, AO). This is the responsibility of the relevant tax office for the custodian institution.

Church tax

Where income tax has already been withheld by a custodian institution in Germany (withholding agent), the applicable church tax will be paid at the applicable rate of the respective religious community to which the tax payer belongs as a surcharge to the withheld tax. Church tax is taken into account as a special expense at the point at which the withholding tax is deducted.

Foreign withholding tax

In some cases foreign withholding taxes are deducted from the foreign gains of the Fund in the country of origin. These withholding taxes cannot be taken into account as a special expense.

Consequences of the merger of funds

If a German fund is merged with another German fund, for which the same partial exemption rate is applied, this does not result in fair value adjustments from the realisation of “hidden reserves” either at the level of the investor or participating funds, that is, the merger is tax-neutral. If the investors in the transferring fund receive a cash payment that is provided in the draft terms of mergers, this is treated like a distribution.

If the applicable partial exemption rate of the transferring fund differs from that of the acquiring fund, then the unit of the transferring fund is deemed sold and the unit of the acquiring fund is deemed acquired. The gain from the notional sale is only deemed to have accrued as soon as the unit of the acquiring fund is actually sold.

Automatic exchange of information in tax matters

In recent years, the importance of the automatic exchange of information to combat cross-border tax fraud and cross-border tax evasion has increased significantly at international level. The OECD therefore published a global standard for the automatic exchange of information on financial accounts in tax matters (Common Reporting Standard, hereinafter: “CRS”) etc. At the end of 2014, the CRS was integrated with Council Directive 2014/107/EU of 9 December 2014 into Directive 2011/16/EU on the obligation to exchange information in the field of taxation automatically. The participating states (all Member States of the EU as well as several third countries) have been applying the CRS in the meantime. Germany has implemented the CRS into German law with the Law on the Automatic Exchange of Financial Account Information (Finanzkonten-Informationsaustauschgesetz) of 21 December 2015.

The CRS requires reporting financial institutions (mainly credit institutions) to collect certain information about their clients. Where customers (natural persons or entities) are reportable persons resident in other participating states (other than, for example, listed corporations or financial institutions), their accounts and securities accounts are classified as reportable accounts. The reporting financial institutions will then transmit certain information to their home tax authority for each reportable account. The latter then transmits the information to the home tax office of the client.

The information to be transmitted essentially concerns the personal data of the client to be reported (name, address, tax identification number, date of birth and place of birth (for natural persons), country of residence) as well as information on the accounts and securities accounts (e.g. account number, account balance or account value, total gross amount of income such as interest, dividends or distributions from investment funds); gross total proceeds from the sale or return of financial assets (including fund units)).

Consequently, reportable investors holding an account and/or securities account with a credit institution domiciled in a participating state are specifically affected. Therefore, German credit institutions will report information on investors resident in other participating states to the Federal Central Tax Office, which will forward the information to the respective tax authorities of the countries of residence of the investors. Correspondingly, credit institutions in other participating states will report information about investors residing in Germany to their respective home tax authority, which will forward the information to the Federal Central Tax Office. Finally, it is conceivable that credit institutions based in other participating states may report information on investors in turn resident in other participating states to their respective home tax authority, which will forward the information to the respective tax authorities of the countries of residence of the investors.

General remark

The tax statements are based on the currently known legal situation. They are addressed to persons who are subject to unlimited income tax liability or unlimited corporation income tax liability in Germany. However, no responsibility is taken

for the fact that the tax treatment will not change as a result of legislation, court rulings or decrees issued by the financial authorities.

Service providers

Investment counselling

Enterprises taking over functions that are outsourced by the Company are set out under outline item “Outsourcing”. The Company has not commissioned any further service providers relevant to the management of the Fund.

Outsourcing

The Company has outsourced the following activities:

The portfolio management for the Fund was outsourced to LOYS AG, Alte Amalienstraße 30, 26135 Oldenburg, Germany.

Compliance, internal auditing, accounting and IT services have been outsourced to group companies, i.e. Talanx AG (compliance and internal auditing), HDI Service AG (from 01.03.2022 HDI AG) (accounting) and HDI Systeme AG (from 01.03.2022 HDI AG) (IT services). They are associated companies of the Company, which may result in conflicts of interest.

Conflicts of interests

The following conflicts of interests may arise to the Company:

The investor's interests may conflict with the following interests:

- incentive systems for staff of the Company,
- personal account dealings,
- bestowals to the Company's staff,
- shifting in the Fund,
- key date-related improvement of the Fund's performance (“window dressing”),
- dealings between the Company and the investment funds or individual portfolios managed by it or
- dealings between investment funds managed by the Company and/or individual portfolios,

- consolidation of several orders (“block trades”),
- instruction of related companies and persons,
- individual large-scale investments,
- If, following an oversubscription on a share issue, the Company has subscribed for several investment funds or individual portfolios (“IPO allocations”)
- transactions after the close of trading at the foreseeable closing price of the current day, so-called late trading.

Non-cash benefits (broker research, financial analyses, market and price information systems) may accrue to the Company in connection with transactions entered into for account of the Fund that are used in the investors' interest when investment decisions are made.

The remunerations and reimbursements of expenses paid to the custodian and third parties out of the Fund are not repaid to the Company.

The Company grants recurrent agency fees known as “follow-up agency commissions” to intermediaries, such as financial institutions, mainly in yearly intervals.

The Company takes the following organisational measures to deal with conflicts of interests and to identify, prevent, control, observe and disclose conflicts of interests:

- existence of a Compliance Department that controls whether laws and rules are complied with and has to be notified of the conflicts of interests.
- disclosure obligations
- organisational measures, such as
 - the establishment of confidential areas for individual departments to prevent a misuse of confidential information
 - allocation of responsibilities to prevent an improper exercise of influence
 - the separation between trading for the Fund's own account and customer trading
- rules of conduct for the staff with regard to personal account dealings, obligation to comply with insider legislation
- establishment of appropriate fee systems
- principles governing the consideration of customers' interests and investor- and investment-specific advice and compliance with the agreed investment policy

- principles governing the best possible execution with regard to the acquisition or sale of financial instruments respectively
- establishment of order acceptances deadlines (cut-off times).

Annual reports/semi-annual reports/auditors

The annual reports and semi-annual reports can be obtained from the Company. The reports can also be downloaded from the homepage (www.ampega.com).

PricewaterhouseCoopers GmbH Wirtschaftsprüfungsgesellschaft has been appointed as auditor of the Funds and the annual reports. The auditor audits the annual report of the Fund. The auditor must summarise the result of the audit in the auditor's report which has to be included in the annual report in unabridged form. During the audit, the auditor also has to state whether the provisions set out in the Capital Investment Code and in the Terms and Conditions of Investment have been complied with in the management of the Fund. The auditor must submit the report on the audit of the Fund to the Federal Financial Supervisory Authority upon request.

Payments to investors, distribution of reports and other information

The contract with the custodian ensures that the investors receive the distributions and that units are redeemed. The information set out in this in sales prospectus can be obtained via the channels listed in the section "Fundamentals - sales documents and disclosure of information". Further, these documents may be obtained from the custodian.

Special funds

There are also 71 special funds (as of 1 January 2022).

Notice regarding the purchaser's right of revocation

If the purchase of units in open-end funds is brought about due to oral negotiations off the permanent business premises of the party who sold or arranged the sale of the units, the purchaser is entitled to revoke his declaration indicating his intent to purchase in writing and without giving reasons within a period of two weeks. The purchaser is instructed about the right of revocation in the duplicate of the application form/bought note. The right of revocation shall also apply if the party selling or arranging the sale of the units has no permanent business premises.

There is no right of revocation if the seller proves that (i) the purchaser is not a natural person who concludes the legal transaction for a purpose that cannot be attributed to their professional activity (consumer) or (ii) a negotiation has been conducted on the purchaser's initiative, i.e. the seller has visited the purchaser for negotiation purposes on the basis of the purchaser's previous order. There is no right of revocation for contracts which have been brought about exclusively by means of distance communication (e.g. letters, phone calls, e-mails) (distance contracts on financial services).

Information on any changes is provided in the periodic semi-annual and annual reports as well as on the homepage of Ampega Investment GmbH (www.ampega.com).

General Terms and Conditions of Investment

governing the legal relationship between the Investors and Ampega Investment GmbH, (Cologne), (hereinafter referred to as the "Company") for the funds managed by the Company in accordance with the UCITS Directive that only apply in conjunction with the "Special Terms and Conditions of Investment" set for the respective UCITS fund.

1. Fundamentals

1. The Company is a UCITS Investment management company and is subject to the provisions of the Kapitalanlagegesetzbuch (Capital Investment Code, KAGB).
2. The Company invests the money deposited with it in its own name for joint account of the investors in accordance with the principles of diversification in the assets permitted by the Capital Investment Code and separated from its own assets in the form of UCITS funds. The resulting rights of investors are vested in global certificates.
The business purpose of the UCITS fund is restricted to investments in accordance with a preset investment strategy in the scope of a collective management of assets by means of the funds invested in it; an operating activity and an active entrepreneurial control of the assets held is excluded.
4. The legal relationship between the Company and the investor is governed by the General Terms and Conditions of Investment (GTCIs) and the Special Terms and Conditions of Investment (STCIs) of the UCITS fund and the Capital Investment Code.

2. Custodian

1. The Company shall appoint a financial institution as custodian; the custodian shall act independently of the Company and exclusively in the interest of the investors.
2. The custodian is obliged to perform the tasks and duties prescribed by the custodian agreement entered into with the Company, the Capital Investment Code as well as the Terms and Conditions of Investment.
3. The custodian may outsource custodial duties to another company (sub-custodian) in accordance with section 73 of the Capital Investment Code. The sales prospectus contains further guidance in this respect.
The custodian is liable towards the UCITS fund or the investors for the loss of a financial instrument held in custody in accordance with section 72 (1) no.1 of the Capital Investment Code that is caused by the custodian or a sub-custodian to which the custody of financial instruments pursuant to section 73 (1) of the Capital Investment Code was delegated. The custodian is not liable if it is able to prove that the loss is due to external occurrences whose consequences were inevitable despite the taking of all appropriate countermeasures. Further claims arising from the civil-law provisions due to contracts or tortious acts remain unaffected. The custodian is also liable towards the UCITS fund or the investors for all other losses sustained by the latter as a result of intentional or negligent non-performance of the obligations set out in the Capital Investment Code by the custodian. The custodian's liability remains unaffected by a potential transfer of the custodial duties as specified in paragraph 3 sentence 1.

3. Fund management

1. The Company shall acquire and manage the assets in its own name for joint account of the investors with due expertise, honesty, care and diligence. It shall act independently of the custodian in performing its duties and exclusively in the interest of the investors.
2. The Company is entitled to acquire the assets using the money deposited by the investors, to re-sell these and to invest the proceeds elsewhere; it is further authorised to conduct all legal actions arising from the management of the assets.
3. The Company must not grant cash loans for joint account of the investors nor enter into surety obligations or guarantees; it must not sell any assets as defined in sections 193, 194 and 196 of the Capital Investment Code that do not belong to the UCITS fund at the point that the transaction is concluded. This is without prejudice to section 197 of the Capital Investment Code.

4. Investment principles

The UCITS fund is directly or indirectly invested in accordance with the principle of risk diversification. The Company shall only acquire such assets for the UCITS fund

that are expected to produce a return and/or capital growth. It shall declare in the STCIs which assets may be acquired for the UCITS fund.

5. Securities

Unless the STCIs include any further restrictions, the Company may only acquire securities for account of the UCITS fund if, subject to section 198 of the Capital Investment Code:

- a. they are admitted for trading on a stock exchange in a Member State of the European Union or a state party to the Agreement on the European Economic Area or are admitted to or included in another organised market;
- b. they are exclusively admitted for trading on a stock exchange outside the Member States of the European Union or the states party to the Agreement on the European Economic Area or admitted to another organised market or included in such market provided that that the selection of this stock exchange or this organised market is authorised by the Federal Financial Supervisory Authority*.
- c. their conditions of issue stipulate that admission for trading on a stock exchange or their admission to or inclusion in an organised market in a Member State of the European Union or a state party to the Agreement on the European Economic Area is to be applied for, provided that the admission or inclusion of these securities takes place within one year of their issue;
- d. their conditions of issue stipulate that admission for trading on a stock exchange outside a Member State of the European Union or a state party to the Agreement on the European Economic Area or their admission to or inclusion in an organised market outside a Member State of the European Union or a state party to the Agreement on the European Economic Area is to be applied for, provided the selection of this stock exchange or this organised market is approved by the Federal Financial Supervisory Authority and the admission or inclusion of these securities takes place within one year of their issue;
- e. they are equities to which the UCITS fund is entitled in the course of a capital increase from company reserves;
- f. they were acquired in the exercise of subscription rights that belong to the UCITS fund;
- g. they are units in closed-end funds that satisfy the criteria set out in section 193 (1) sentence 1 no. 7 of the Capital Investment Code;
- h. they are financial instruments that satisfy the criteria set out in section 193 (1) sentence 1 no. 8 of the Capital Investment Code.

The securities described in sentence 1 letters a) to d) may only be acquired if the requirements of section 193 (1) sentence 2 of the Capital Investment Code are additionally satisfied. Subscription rights arising from securities may be acquired, which, in turn, may be acquired pursuant to the present section 5.

6. Money market instruments

1. Notwithstanding any further restrictions contained in the STCIs, the Company may, subject to section 198 of the Capital Investment Code, acquire for account of the UCITS fund instruments that are usually traded on the money markets and interest-bearing securities that have a residual term to maturity of no more than 397 days at the point of acquisition by the UCITS fund, for which the interest payments are adjusted regularly throughout their term, and at least once within the 397 days, in line with market rates or whose risk profile corresponds to the risk profile of such securities (money market instruments). Money market instruments may only be acquired for the UCITS fund if they:
 - a. are admitted for trading on a stock exchange in a Member State of the European Union or a state party to the Agreement on the European Economic Area or are admitted to or included in another organised market;
 - b. are exclusively admitted for trading on a stock exchange outside the Member States of the European Union or the states party to the Agreement on the European Economic Area or admitted to another organised market or included in such market provided that that the selection of this stock exchange or this organised market is authorised by the Federal Financial Supervisory Authority;
 - c. are issued or guaranteed by the European Communities, the Federal Government, a special fund of the German Federal Government, a German Federal State, another Member State or another central-state, regional or local authority or the central bank of a Member State of the European Union, the Eu-

* The list of stock exchanges is published on the homepage www.bafin.de of the Federal Financial Supervisory Authority² please see footer 1

European Central Bank or the European Investment Bank, a third state or, if this is a Federal State, a constituent state of such Federal State, or an international public-law institution of which at least one Member State of the European Union is a member;

- d. are issued by a company whose securities are traded on the markets described in letters a. and b.;
 - e. are issued or guaranteed by a financial institution that is subject to supervision in compliance with the criteria set down by European Community law, or a financial institution that is subject to supervision and is considered by the Federal Financial Supervisory Authority to be equivalent to those of European Community law and complies with this; or
 - f. are issued by other issuers and satisfy the requirements of section 194 (1) sentence 1 no. 6 of the Capital Investment Code.
2. Money market instruments as defined in paragraph 1 may only be acquired if they satisfy the relevant requirements of section 194 (2) and (3) of the Capital Investment Code.

7. Bank deposits

The Company may hold bank deposits for account of the UCITS fund that have a term of no more than twelve months. The deposits, which must be held in blocked accounts, may be held at a financial institution headquartered in a Member State of the European Union or a state party to the Agreement on the European Economic Area; the deposits may also be held with a financial institution headquartered in a third state whose supervisory provisions the Federal Financial Supervisory Authority considers to be equivalent to those of European Community law. Provided nothing to the contrary is specified in the STCIs, the bank deposits may also be denominated in a foreign currency.

8. Investment units

1. Provided nothing to the contrary is specified in the STCIs, the Company may acquire units in funds as defined by Directive 2009/65/EC (UCITS) for account of the UCITS fund. Units in other German funds and closed-end funds with variable capital as well as units in open-end EU AIF and as foreign open-end AIF may be acquired provided they comply with the requirements of section 196 (1) sentence 2 of the Capital Investment Code.
2. The Company may only acquire units in German funds and closed-end funds with variable capital, EU UCITS in open-end EU AIF and in foreign open-end AIF if the terms and conditions of investment or the Articles of Association of the investment management company, the closed-end fund with variable capital, the EU investment fund, the EU management company of the foreign AIF or the foreign AIF management company permit a total of no more than 10% of the value of their assets to be invested in units of other German funds, closed-end funds with variable capital, open-end EU investment funds or foreign open-end AIF.

9. Derivatives

1. Provided nothing to the contrary is specified in the STCIs, the Company may use derivatives in its management of the UCITS fund in accordance with section 197 (1) sentence 1 of the Capital Investment Code and financial instruments with a derivative component in accordance with section 197 (1) sentence 2 of the Capital Investment Code. Dependent on the type and volume of the derivatives and financial instruments with a derivative component, the Company may use either the simple or qualified approach as defined by the "Ordinance on Risk Management and Risk Measurement upon the Use of Derivatives, Loans on Securities and Repurchase Transactions in Investment Funds pursuant to the Capital Investment Code" (Derivateverordnung, DerivateV), enacted under section 197 (3) of the Capital Investment Code to determine the extent to which the market risk threshold set pursuant to section 197 (2) of the Capital Investment Code for the use of Derivatives and financial instruments with a derivative component has been reached; the sales prospectus contains further guidance in this respect.
2. If the Company uses the simple approach, it may only use basic types of derivative and financial instruments with a derivative component or combinations of these derivatives, financial instruments with a derivative component as well as underlying assets permitted under section 197 (1) sentence 1 of the Capital Investment Code in the UCITS fund. Complex derivatives with underlying assets pursuant to section 197 (1) sentence 1 of the Capital Investment Code may only be used to a negligible extent. The attributable amount of the UCITS fund determined pursuant to section 16 of the Derivatives Ordinance for the market risk must not exceed the value of the fund at any time. Basic forms of derivatives are:
 - a. futures contracts on the underlying assets pursuant to section 197 (1) of the Capital Investment Code with the exception of investment units as defined in section 196 of the Capital Investment Code;
 - b. options or warrants on the underlying assets pursuant to section 197 (1) of the Capital Investment Code with the exception of investment units pursuant to section 196 of the Capital Investment Code and on futures as per letter a) if they exhibit the following characteristics:
 - aa. they may be exercised during the overall term or at the end of the term and
 - bb. the option value at the point of exercise is directly dependent on the positive or negative difference between the strike price and market price of the underlying asset and will be zero if the difference has the opposite sign;
 - c. interest rate swaps, currency swaps or interest rate/ currency swaps;
 - d. options on swaps as defined in letter c) provided they exhibit the characteristics described in lit. aa) and bb) of letter b) (swaptions);
 - e. credit default swaps that refer to one single underlying value (single name credit default swaps).

3. If the Company uses the qualified approach, it may - subject to a suitable risk management system - invest in any financial instruments with a derivative component or derivatives that are derived from an underlying asset permissible under section 197 (1) sentence 1 of the Capital Investment Code.

In this respect the potential risk sum attributable to the UCITS fund for the market risk ("risk amount") must not exceed twice the potential risk amount for the market risk of the respective benchmark asset pursuant to section 9 of the Derivatives Ordinance. Alternatively, the risk amount must never exceed 20% of the value of the UCITS fund.

4. Under no circumstances may the Company deviate from the investment principles and thresholds set out in the Terms and Conditions of Investment and in the sales prospectus in the course of such transactions.
5. The Company shall use derivatives and financial instruments with a derivative component for the purposes of hedging, efficient portfolio management and the generation of additional income if and to the extent that it deems this to be in the investors' interests.
6. When determining the market risk threshold for the use of derivatives and financial instruments with a derivative component, the Company may switch from the simple to the qualified approach pursuant to section 6 Clause 3 of the Derivatives Ordinance at any time. The switch does not require the approval of the Federal Financial Supervisory Authority; however, the Company must notify the Federal Financial Supervisory Authority of the switch immediately and announce it in the next semi-annual or annual report.
7. When using Derivatives and financial instruments with a derivative component the Company shall comply with the Derivatives Ordinance.

10. Other investment instruments

Unless any contrary provisions are specified in the STCIs, the Company may for account of the UCITS fund acquire other investment instruments up to a total of 10% of the value of the UCITS fund pursuant to section 198 of the Capital Investment Code.

11. Issuer limits and investment restrictions

1. In managing the funds, the Company shall observe the limits and restrictions imposed by the Capital Investment Code, the Derivatives Ordinance and in the terms and conditions of investment.
2. Securities and money market instruments, including securities purchased under repurchase agreements and money market instruments of the same issuer, may be acquired in excess of 5% and up to 10% of the value of the UCITS fund; the total value of securities and money market instruments of these issuers must not exceed 40% of the value of the UCITS fund. The issuers of securities and money market instruments must also be taken into account within the limits specified in sentence 1 above if the securities and money market instruments issued by them are acquired indirectly via other securities contained in the UCITS that are linked to their performance.
3. The Company may invest up to 35% of the value of the UCITS fund in any bonds, promissory note loans and money market instruments that are issued or guaranteed by the Federal Government, a German Federal State, the European Communities, a Member State of the European Union or its local authorities, a state party to the Agreement on the European Economic Area, a third state or an international organisation to which at least one Member State of the European Union belongs.
4. The Company may invest up to 25% of the value of the UCITS fund in mortgage debentures (Pfandbriefe) and municipal bonds and in bonds issued by financial institutions headquartered in a Member State of the European Union or a state party to the Agreement on the European Economic Area if such financial institutions are subject to special public supervision by law for the protection of the holders of these bonds and the moneys received on the issue of the bonds are invested in line with statutory provisions in assets that adequately cover the liabilities arising from them over the full term of the bonds and that are used with a priority for redemption payments and any interest that falls due should the issuer default. If the Company invests more than 5% of the value of the UCITS fund in bonds of the same issuer pursuant to sentence 1, the total value of these bonds must not exceed 80% of the value of the UCITS fund.

5. The limit set in paragraph 3 may be exceeded pursuant to section 206 (2) of the Capital Investment Code for securities and money market instruments from the same issuer provided that the STCIs permit this for that particular issuer. In such cases the securities and money market instruments held for account of the UCITS fund must derive from at least six different issues, whereby no more than 30% of the Fund may be held in a single issue.
6. The Company may only invest up to 20% of the value of the UCITS fund in bank deposits at any one financial institution pursuant to section 195 of the Capital Investment Code.
7. The Company must ensure that a combination of:
 - a. securities or money market instruments issued by one and the same institution,
 - b. deposits at that institution, and
 - c. the applicable amounts for the counterparty risk of the transactions entered into with this institution,
 do not exceed 20% of the value of the UCITS fund. Sentence 1 applies to the issuers and guarantors named in paragraphs 3 and 4 subject to the obligation on the Company to ensure that a combination of the assets and applicable amounts specified in sentence 1 do not exceed 35% of the value of the UCITS fund. This is without prejudice to the respective individual upper limits in both cases.
8. The bonds, promissory note loans and money market instruments specified in paragraphs 3 and 4 are not taken into account when the limits of 40% as specified in paragraph 2 are used. Notwithstanding the provision in paragraph 7, the limits specified in paragraphs 2 to 4 and paragraphs 6 to 7 must not be aggregated.
9. The Company may only invest up to 20% of the value of the UCITS fund in units in a single investment fund in accordance with section 196 (1) of the Capital Investment Code. The Company may only invest up to 30% of the value of the UCITS fund in units in investment funds in accordance with section 196 (1) sentence 2 of the Capital Investment Code. The Company may acquire no more than 25% of the issued units of another German, EU or foreign open-end investment fund that is invested in assets according to the principle of diversification and in accordance with sections 192 to 198 of the Capital Investment Code, for account of the UCITS fund.

12. Merger

1. The Company may, in accordance with sections 181 to 191 of the Capital Investment Code:
 - a. transfer all assets and liabilities of this UCITS fund to another existing fund or another UCITS fund newly created as a result of the merger or an EU UCITS or a UCITS closed-end fund with variable capital;
 - b. admit all assets and liabilities of another open-end fund to this UCITS fund;
2. The merger requires the approval of the respective supervisory authority. The details of the procedure are contained in sections 182 to 191 of the Capital Investment Code.
3. The UCITS fund may only be merged with a fund that is no UCITS if the acquiring or newly established investment fund continues to be a UCITS. Mergers of an EU UCITS with the UCITS fund may also take place in accordance with the provisions of article 2 (1) lit. p figure iii of Directive 2009/65/EC.

13. Loans on securities

1. The Company may, for account of the UCITS fund, grant a loan on securities to a securities borrower for a fee in line with market rates on the provision of sufficient collateral pursuant to section 200 (2) of the Capital Investment Code that may be called in at any time. The market value of the securities being transferred along with the market value of the securities already transferred to the same securities borrower including companies belonging to the group within the meaning of section 290 of the Handelsgesetzbuch (German Commercial Code, HGB) as a securities loan for account of the UCITS fund must not exceed 10% of the value of the UCITS fund.
2. If the securities borrower has provided cash as collateral for the transferred securities, the deposits must be held in blocked accounts as defined under section 200 (2) sentence 3 no. 1 of the Capital Investment Code. Alternatively the Company may invest such cash in the following assets that are denominated in the same currency as the cash:
 - a. in high-quality bonds that have been issued by the German Federal Government, a German Federal State, the European Union, a Member State of the European Union or its local authorities, another state party to the Agreement on the European Economic Area or a third country;
 - b. in money market funds with a short-term structure in accordance with the guidelines issued by the Federal Financial Supervisory Authority on the basis of section 4 (2); or
 - c. by way of a reverse repurchase agreement with a financial institution that ensures that accrued cash is recovered at any time.
 The income from the investment of the collateral is due to the UCITS fund.

3. The Company may also use a system organised by a central securities depository for brokering and processing securities loans, which deviates from the requirements under section 200 (1) sentence 3 of the Capital Investment Code if the right to give notice to terminate at any time under sub-section 1 is not deviated from.
4. Provided nothing to the contrary is specified in the STCIs, the Company may also grant loans on securities in relation to money market instruments and investment units, provided that these assets may be acquired by the UCITS fund. The provisions of paragraphs 1 to 3 apply analogously in this respect.

14. Repurchase agreements

1. The Company may, for account of the UCITS fund, enter into securities repurchase agreements as defined by section 340 b (2) of the German Commercial Code with financial institutions or financial services institutions for a fee at any time on the basis of standardised framework contracts.
2. The repurchase agreements must be based on securities that may be acquired for the UCITS fund in accordance with its terms and conditions of investment.
3. The repurchase agreements may have a term of no more than twelve months.
4. Provided nothing to the contrary is specified in the STCIs, the Company may also enter into repurchase agreements in respect of money market instruments and investment units, provided that the UCITS fund may acquire these assets. The provisions of paragraphs 1 to 3 apply analogously in this respect.

15. Borrowing

The Company may enter into short-term borrowing arrangements of up to 10% of the value of the UCITS fund for joint account of the investors if the conditions of the borrowing are on standard market terms and the custodian approves the borrowing.

16. Units

1. The units in the fund are made out to bearer and are securitised in unit certificates or issued as electronic unit certificates.
2. Securitised unit certificates are securitised in a global certificate; the issue of individual certificates is excluded. By acquiring a unit in the fund, the investor acquires a co-ownership share in the global certificate. Unless otherwise stipulated in the STCIs, the latter is transferable.
3. The rights of the units may vary, in particular in respect of the appropriation of earnings, the front-end fee, the redemption fee, the unit currency, the management fee, the minimum investment amount or a combination of these features (unit classes). The details are set out in the STCIs.

17. Issue and redemption of unit certificates, Limitations and suspension of redemption

1. There is no limit on the number of the issued units that may be issued. The Company reserves the right to discontinue the issue of units either temporarily or permanently.
2. The units may be acquired from the Company, the custodian or through third-party intermediaries. The STCIs may provide that units may be acquired or held only by certain investors.
3. Investors may request the Company to redeem the units. The STCIs can stipulate surrender deadlines. The Company is obliged to redeem the units at the applicable redemption price for the account of the UCITS fund. The custodian is the redemption agent.
4. Unless otherwise stipulated in the STCIs, the Company reserves the right to restrict the redemption of units for up to 15 working days if the redemption requests from investors reach a threshold above which the redemption requests can no longer be executed in the interest of all investors due to the liquidity situation of the assets of the fund. The threshold value is specified in the STCIs. It describes the return request as a percentage of the net asset value of the fund. In this case, the Company shall only partially comply with the return request per investor, otherwise the redemption obligation shall not apply. This means that every redemption order is only executed in part. The unexecuted part of the order (remaining order) will not be executed by the Company at a later point in time, but will expire (pro-rata approach with expiry of the remaining order). Further details on the procedure for the redemption restriction can be found in the sales prospectus. The Company must immediately publish the restriction on the redemption of units and its cancellation on its website.
5. The Company also reserves the right to suspend the redemption of units in accordance with section 98 (2) of the Capital Investment Code if there are extraordinary circumstances that make a suspension appear necessary, taking into account the interests of the investors.
6. The Company shall notify the investors of the suspension of redemption and its resumption via a notification in the electronic Federal Gazette as well as in a sufficiently widely-distributed financial or daily newspaper or in the electronic information media specified in the sales prospectus pursuant to paragraph 4. Investors shall be immediately notified about the suspension and resumption of

the redemption of the units on the announcement in the electronic Federal Gazette by durable medium.

18. Subscription and redemption prices

Unless otherwise stipulated in the STCIs, the market values of the assets belonging to the UCITS fund minus the loans taken out and other liabilities (net asset value) are determined and divided by the number of units in circulation to calculate the issue and redemption prices of the units ("unit value"). If different unit classes are introduced for the UCITS fund in accordance with section 16 (2), the unit value and the issue and redemption prices must be determined separately for each unit class. The assets are valued in accordance with sections 168 and 169 of the Capital Investment Code and the German Capital Investment Accounting and Valuation Ordinance (Kapitalanlage-Rechnungslegungs- und Bewertungsverordnung (KARBV)).

2. The subscription price is equal to the unit value in the UCITS fund plus any front-end fee specified in the STCIs pursuant to section 165 (2) no. 8 of the Capital Investment Code. The redemption price is equal to the unit price in the UCITS fund less any redemption fee specified in the STCIs pursuant to section 165 (2) no. 8 of the Capital Investment Code.
3. The settlement date for unit subscriptions and redemption orders shall be no later than the next valuation date following the request for subscription or redemption, unless otherwise specified in the STCIs.
4. The subscription and redemption prices are calculated on each trading day. Unless otherwise specified in the STCIs, the Company and custodian need not determine the value on public holidays that are trading days and on 24 and 31 December of each year; further guidance is contained in the sales prospectus.

19. Costs

The STCIs list the fees payable to the Company, the custodian and third parties that may be charged to the UCITS fund. The STCIs are further required to detail the method, the amount calculation basis of any fees defined in sentence 1.

20. Accounts

1. No later than four months after expiry of the UCITS fund's financial year, the Company shall publish an annual report including a statement of income and expenditure in accordance with section 101 (1), (2) and (4) of the Capital Investment Code.
2. No later than two months after the middle of the financial year the Company shall publish a semi-annual report in accordance with section 103 of the Capital Investment Code.
3. If during the financial year the right to manage the UCITS fund is transferred to another investment management company or if the UCITS fund is merged with another UCITS fund, a closed-end fund with variable capital or an EU UCITS during the financial year, the Company shall produce an semi-annual report for the transfer date that complies with the requirements of an annual report in accordance with paragraph 1.
4. If the UCITS fund is liquidated, the custodian shall produce a liquidation report annually and also for the day on which the liquidation concludes that complies with the requirements of an annual report in accordance with paragraph 1.
5. The reports may be obtained from the Company and the custodian and other agents specified in the sales prospectus and in the key investor information; they are also published in the electronic Federal Gazette.

21. Termination and liquidation of the UCITS fund

1. The Company may terminate the management of the UCITS fund by giving at least six months' notice via a notice in the electronic Federal Gazette and additionally in the annual report or semi-annual report. The investors shall be notified of any termination in accordance with sentence 1 via an announcement on a durable medium without delay.
2. The Company's right to manage the UCITS fund lapses when the termination takes effect. In this case the UCITS fund, or the right of disposal over the UCITS fund, is transferred to the custodian, which must liquidate the assets and distribute them to the investors. For the period of the liquidation the custodian may claim any fees for the liquidation and a reimbursement of its expenses required for the liquidation. With the approval of the Federal Financial Supervisory Authority, the custodian may opt out of the liquidation and distribution and transfer the management of the UCITS fund to another investment company in accordance with the existing terms and conditions of investment.
3. The Company must produce a liquidation report for the day on which its right to manage the UCITS fund lapses pursuant to section 99 of the Capital Investment Code that complies with the requirements of an annual report as specified in section 20 (1).

22. Change of management company and custodian

1. The Company may delegate the management right and the right to dispose of the UCITS fund to another management company. The transfer is subject to prior approval by the Federal Financial Supervisory Authority.
2. The approved delegation shall be announced in the Federal Gazette and also in the annual report or semi-annual report as well as in the electronic information media specified in the sales prospectus. The delegation shall take effect no earlier than three months after its announcement in the Federal Gazette.
3. The Company may change the custodian for the UCITS fund. The change requires the approval of the Federal Financial Supervisory Authority.

23. Changes to the terms and conditions of investment

1. The Company may amend the terms and conditions of investment.
2. Amendments of the terms and conditions of investment shall require the prior approval of the German Federal Financial Supervisory Authority.
3. All proposed amendments shall be announced in the Federal Gazette and also in a business journal or daily newspaper with sufficient circulation or in the electronic information media specified in the sales prospectus. In a publication according to sentence 1 above, the intended amendments and their entry into force must be pointed out. In the case of changes in costs that are disadvantageous to investors within the meaning of section 162 (2) number 11 of the Capital Investment Code or changes that are disadvantageous to investors with regard to essential investor rights and in the case of amendments of the investment principles of the UCITS fund within the meaning of section 163 (3) of the Capital Investment Code, the essential contents of the proposed amendments of the terms and conditions of investment and their background are to be communicated to the investors at the same time as the announcement according to sentence 1 above in a comprehensible manner using a permanent data carrier in accordance with section 163 (4) of the Capital Investment Code. In the event of changes to the previous investment principles, investors must also be informed of their rights under section 163 (3) of the Capital Investment Code.
4. The amendments shall take effect no earlier than the day after their publication in the electronic Federal Gazette; amendments to the cost or investment principles shall not take effect until at least four weeks after the corresponding publication.

24. Place of performance, jurisdiction

The place of performance is the place at which the Company has its registered office.

25. Dispute resolution procedure

The Company has undertaken to participate in dispute resolution procedures before a consumer conciliation board. In the event of disputes, consumers might have recourse to the "ombudsman service for investment funds" of BVI Bundesverband Investment und Asset Management e. V. (Federal Investment and Asset Management Association) as the competent consumer conciliation board. The Company takes part in dispute resolution procedures before this conciliation board. The contact data is as follows: Office of the ombudsman service of BVI Bundesverband Investment und Asset Management e. V., Unter den Linden 42, D-10117 Berlin, www.ombudsstelle-investmentfonds.de. (in German)

The European Commission has set up a European online dispute resolution platform at www.ec.europa.eu/consumers/odr e. Consumers can use it for the extrajudicial settlement of disputes arising from online sales contracts or online service contracts. The Company's e-mail address is: fonds@ampega.com.

Special Terms and Conditions of Investment

governing the legal relationship between the investors and Ampega Investment GmbH, Cologne (hereinafter referred to as the “Company”) for the fund LOYS Global MH managed by the Company in accordance with the UCITS Directive that only apply in conjunction with the “General Terms and Conditions of Investment” set by the Company for this fund.

Investment principles and Investment limits

1. Assets

The Company may acquire the following assets for the UCITS fund:

1. securities pursuant to clause 5 of the General Terms and Conditions of Investment (hereinafter referred to as “GTCIs”)
2. money market instruments pursuant to clause 6 of the GTCIs,
3. bank deposits pursuant to clause 7 of the GTCIs,
4. investment units pursuant to clause 8 of the GTCIs,
5. derivatives pursuant to clause 9 of the GTCIs,
6. other investment instruments pursuant to clause 10 of the GTCIs.

2. Investment principles and investment limits

1. Up to 100% of the value of the UCITS fund may be invested in securities in accordance with clause 5 of the GTCIs. These are essentially equities and bonds. The securities purchased under repurchase agreements are to be included in the investment limits of section 206 (1) to (3) of the Capital Investment Code.
2. At the same time, the following investment limit also applies:
At least 51% of the value of the UCITS fund are invested in equity interests within the meaning of section 2 (8) of the German Investment Tax Act. To this effect, equity interests refer to
 - interests in corporations admitted for official trading on a stock exchange or are admitted to another organised market or included in such market;
 - interests in corporations domiciled in a Member State of the European Union or another contracting state to the Agreement on the European Economic Area which are subject to the taxation of revenue for corporations there and are not exempt from such taxation;
 - interests in corporations domiciled in a third country which are subject to a taxation of revenue for corporations at a rate of at least 15% there and are not exempt from such taxation;
 - interests in other investment funds, either at the rate of the quota of their value published on each valuation day, at which they actually invest in the aforementioned shares in corporations or in the amount of the minimum quota specified in the other investment fund's terms of investment.
3. Up to 49% of the value of the UCITS fund may be invested in money market instruments in accordance with clause 6 of the GTCIs. The money market instruments purchased under repurchase agreements are to be included in the investment limits of section 206 (1) to (3) of the Capital Investment Code.
4. Up to 49% of the value of the UCITS fund may be invested in bank deposits in accordance with clause 7 of the GTCIs.
5. Up to 10% of the UCITS fund may be invested in investment fund units in accordance clause 8 of the GTCIs. These are units in equity funds, bond funds and mixed funds which – taking into account sentence 1 above – may each amount to up to 100% of the trust units acquired. The investment fund units purchased under repurchase agreements are to be included in the investment limits of sections 207 and 210 (3) of the Capital Investment Code.
6. The Company may use derivatives within the scope of managing the UCITS fund in accordance with clause 9 of the GTCIs. Further guidelines are contained in the sales prospectus.

3. Investment committee

The Company may consult an investment committee in selecting the assets to be acquired and disposed of for the UCITS fund.

Unit classes

4. Unit classes

1. Unit classes as defined by clause 16 of the “GTCIs” may be created for the UCITS fund that vary in respect of the appropriation of earnings, the front-end fee, the currency of the unit value including the use of currency hedging transactions, the management fee, the custodian fee, the distribution fee, the performance fee, the consultancy fee, the minimum investment sum or a combination of these features. Unit classes may be created at any time at the discretion of the Company.
2. Currency hedging transactions may be entered into for the exclusive benefit of a single currency unit class. For currency unit classes with currency hedging for the benefit of the currency of this unit class (reference currency), the Company may independently of clause 9 of the “GTCIs” use Derivatives as defined by section 197 (1) of the Capital Investment Code based on exchange rates or currencies with the aim of avoiding losses in unit value attributable to exchange rate losses of UCITS fund assets not denominated in the reference currency of the unit class.
3. The unit value is calculated separately for each unit class in that the costs of the creation of new unit classes, the distributions (including any taxes due to be paid from the fund assets), the management fee, the custodian fee, the distribution fee, the consultancy fee, the performance fee and the proceeds of currency hedging transactions that are attributable to a specific unit class, where applicable including income equalisation, are allocated exclusively to this unit class.
4. The existing unit classes are individually listed both in the sales prospectus and also in the annual and semi-annual report. The features that define the unit classes (appropriation of earnings, front-end fee, currency of unit value, management fee, custodian fee, distribution fee, consultancy fee, performance fee, minimum investment sum or a combination of these features) are described in detail in the sales prospectus and in the annual and semi-annual report.

Unit certificates, subscription price, redemption price, redemption of units and costs

5. Units

The investors own an interest in the respective assets of the UCITS fund as co-owners in proportion to the number of units held.

6. Subscription and redemption price

1. The Company shall specify the front-end fees charged for each unit class in the sales prospectus, in the key investor information and in the annual and semi-annual report.
2. The front-end fee comprises up to 5.0% of the value of each unit, irrespective of the unit class. The Company is entitled to charge a lower front-end fee for one or more unit classes or to waive the front-end fee altogether. Further guidelines are contained in the sales prospectus.
3. Clause 18 paragraph 3 of the GTCIs notwithstanding, the settlement date for subscription and redemption requests shall be no later than the second valuation day that follows the receipt of the subscription or redemption request. Further guidelines are contained in the sales prospectus.
4. No redemption fee is charged.
5. Clause 18 paragraph 4 of the GTCIs notwithstanding, a determination of the subscription and redemption price can be waived on public holidays in North Rhine- Westphalia that are no trading days. Further guidelines are contained in the sales prospectus.

7. Costs

1. Remunerations payable to the Company:

- a. The Company shall receive a flat fee for managing the UCITS fund of 1.65% per annum of the value of the UCITS fund based on the net asset value determined on each trading day. The management fee is deducted from the UCITS fund on a monthly basis. The Company is entitled to deduct a lower management fee for one or several unit classes. Further guidelines are contained in the sales prospectus.

- b. The Company shall receive standard market compensation for the initiation, preparation and execution of securities lending transactions and securities repurchase agreements for the account of the Fund up to the maximum of one third of the gross income from these transactions. The costs incurred in connection with the preparation and execution of such transactions and performance of such agreements, including the fees payable to third parties, shall be borne by the Company.
2. Custodian fee
The custodian shall receive a fee for its activity of 0.05% per annum of the value of the UCITS fund that is calculated and deducted in accordance with paragraph 1. The Company is entitled to deduct a lower custodian fee for one or more unit classes. Further guidelines are contained in the sales prospectus.
3. Fees payable to third parties
 - a. Up to 0.05 % per annum of the value of the UCITS fund on the basis of the net asset value determined on each trading day for costs of legally required representatives and tax representatives. The fee is not covered by the management fee and thus additionally charged to the fund's account.
 - b. Up to 0.10 % per annum of the value of the UCITS fund on the basis of the net asset value determined on each trading day for third-party costs and compensation for services rendered that are used by the Company for concluding and managing derivatives transactions and managing the collateral underlying such derivatives transactions (collateral management). In particular, this also includes services rendered by third parties in the context of performing Regulation (EU) No. 648/2012 European Market Infrastructure Regulation (EMIR), inter alia, by means of reports to trade repositories as well as services rendered in connection with entity identifiers and the central clearing of OTC derivatives. The fee is not covered by the management fee and thus additionally charged to the fund's account.
4. Permissible annual maximum amount
The amount that is deducted annually from the UCITS fund as a fee in accordance with clauses 1a, 2, 3 may total up to 1.93% per annum of the value of the UCITS fund calculated on the basis of the net asset value determined on each trading day.
5. Expenses
Alongside the fees described in the preceding paragraphs, the following expenses may also be charged to the UCITS fund:
 - a. standard bank custody account fees, where applicable including costs of holding foreign assets overseas;
 - b. costs for the print and dispatch of the sales documents required by law (annual and semi-annual reports, sales prospectus, key investor information) intended for the investors;
 - c. costs of publication of the annual and semi-annual reports, the subscription and redemption prices and the distributions or accumulations and the liquidation report as required;
 - d. costs for the creation and use of a durable medium, except in case of providing information on the merger of funds and on measures taken in connection with violations of the investment limits or calculation errors occurring upon the determination of unit values;
 - e. costs of auditing the UCITS fund by the UCITS fund's auditor;
 - f. costs of publishing the tax bases and declaration that the tax-related information has been ascertained in accordance with German tax law;
 - g. costs of establishing and enforcing legal claims of the UCITS fund by the Company for account of the UCITS fund as well as defence of claims made against the Company at the expense of the UCITS fund;
 - h. fees and costs levied by official bodies in relation to the UCITS fund;
 - i. costs for legal and tax advice in respect of the UCITS fund;
 - j. costs as well as any payments that might accrue upon the purchase and/or use and/or specification of a comparison benchmark or financial index;
 - k. costs of instructing proxies;
 - l. costs of the analysis of the investment performance of the UCITS fund by third parties;
 - m. costs of providing third-party material or services for analysis in relation to one or more financial instruments or other assets or in relation to the issuers or potential issuers of financial instruments or closely related to a particular industry or market of up to 0.08% p.a. of the Fund's annual average net asset value, which is calculated on each trading day;
 - n. taxes payable in connection with the fees payable to the Company, the custodian and third parties and the taxes accruing in connection with the costs described above including the taxes arising in connection with the management and custody.
6. Transaction costs
Alongside the fees and expenses described above, the costs arising in connection with the acquisition and disposal of assets are charged to the UCITS fund.
7. Performance fee
 - a) Definition of performance fee
In addition to the remunerations set out in clauses 1 to 6, the Company may receive a performance fee for managing the fund of up to 10.00% per issued unit of the amount by which the unit value at the end of a settlement period exceeds the maximum unit value at the end of the five preceding settlement periods ("high water mark"), but no more than 15.00% of the average net asset value of the fund in the settlement period calculated on the values determined on each trading day. If there exist less than five preceding settlement periods for the fund, all preceding settlement periods shall be taken into account in the calculation of the claim to remuneration. In the first settlement period after the launch of the fund, the high water mark is superseded by the unit value at the beginning of the first settlement period.
The Company is entitled to charge a lower performance fee for one or more unit classes or to waive the performance fee altogether. Further guidelines are contained in the sales prospectus.
 - b. Definition of the settlement period
The settlement period begins on 1 October and ends on 30 September of a calendar year. The first settlement period begins on 30 June 2013 and ends on 30 September 2014.
 - c. Calculation of unit performance
The performance fee is determined in the settlement period on the basis of the unit performance calculated according to the BVI method.
The performance calculation according to the BVI method is based on the internationally accepted "time weighted rate of return" standard method. The calculation method measures the percentage change of the invested assets at the beginning and end of a period under review whereby distributions are notionally invested in new units and thus treated like accumulations. The performance is calculated on the basis of the unit values determined on each trading day. The unit value results from the determined net asset value divided by the number of issued units. The assets and earnings are added to the result and the costs of the UCITS fund as well as any loans taken up and other liabilities are deducted.
 - d. Provision
In line with the result of a daily calculation, a calculated performance fee is set aside in the fund per unit issued or a provision that has already been posted is reversed correspondingly. Reversed provisions accrue to the fund. A performance fee may only be deducted if corresponding provisions have been made.
8. Purchase of investment fund units
The Company shall publish the amount of the front-end fees and redemption fees in the annual report and semi-annual report that has been attributed to the UCITS fund in the reporting period for the acquisition and redemption of units of other funds. If units are acquired that are directly or indirectly managed by the Company itself or an associated company in which the Company has a substantial direct or indirect interest, the Company or the other company may not charge front-end fees or redemption fees. The Company must publish in the annual report and semi-annual report the fees charged to the UCITS fund by the Company itself, another investment company, a closed-end fund or an associated company in which the Company has a substantial direct or indirect interest or a foreign investment company, including its management company as management fee for the units held in the UCITS fund.

Appropriation of earnings and financial year

8. Distribution

1. For the distributing unit classes the Company distributes the interest, dividends and other income - taking the corresponding income equalisation into account - that have accrued over the financial year for account of the UCITS fund that are not used to cover costs. Capital gains - taking the corresponding income equalisation into account - may also be included in the distribution.
2. Distributable pro-rata income as set out in paragraph 1 may be carried forward for distribution in subsequent financial years if the sum of the income carried forward does not exceed 15% of the respective value of the UCITS fund at the end of the financial year. Income from short financial years may be carried forward in full.
3. In the interest of preserving the capital of the fund, income may be partially retained - and in special cases fully retained - in the UCITS fund for reinvestment.
4. Distribution occurs annually within four months of the close of the financial year.
5. Interim distributions are admissible at any time. Information on planned interim distributions is provided in the semi-annual or annual report.

9. Distribution

For accumulating classes the Company shall reinvest the interest, dividends and income from investment fund units as well as remunerations from loan on securities transactions and securities repurchase agreements - taking the corresponding income equalisation into account - and the realised capital gains in the UCITS fund on a pro-rata basis.

10. Financial year

The financial year of the UCITS fund begins on 1st October and ends on 30th September.

11. Restriction on redemption

The Company may restrict redemption if the surrender requests from investors reach at least 5% of the net asset value (threshold).
